India, and China always have frequent interactions between them. A new regional office of the NDB is opened in Sao Paulo and Moscow. Another significant development that helped Russia overcome Western-imposed economic sanctions was the 2019 Brasilia declaration, noting a BRICS survey on an International Payment System that currently takes place through SWIFT. It has resulted in the Transfer of Financial Messages system for carrying out bank-to-bank transfers that came into force in 2017 (Kapoor 2020). However, the Ukraine crisis is a testing time for the progress of the BRICS group because the West imposed several sanctions on Russia. Notably, Russia was removed from the SWIFT payments, and several countries severed their ties with the Russian federation. Further, the cancellation of Mastercard, Visa, American Express, and many Western countries' business companies like Pepsi, CoCa-Cola, McDonald's, and several others are mulling to move away from Russia (Haider 2022). Likewise, the BRICS development bank also put all the transactions with the Russian Federations due to its attack on Ukraine (The Economics Times 2022). In this situation, groups like the BRICS would help approach the conflict-involved countries to resolve the rift amicably. In this instance, many Western countries approached India's Prime Minister to contact Putin to halt the aggressive moves of Russia in the Ukraine crisis.

Russia's Focus Shift to Security

The initial objectives of the BRICS cooperation pertained to economic, trade, and international order issues. However, a later part of the BRICS summit declarations signaled that security is also one aspect of BRICS consultations due to the growing incidents of terrorism in international relations. Russian foreign policy is currently built based on three pillars. The essential Russian federation foreign policy posts are military strength, nuclear capacity—through energy and raw materials—and Russia's membership in key international organizations. The central organization in concern is the United Nations Security Council. Thus, Russia preserved its international standing by leveraging these pillars (Ivano 2011). The global north struggled to overcome, whereas the non-west increased in the political and economic stream. Despite Putin's regime in Kremlin, Russia was made more powerful. The Arab crisis, especially the Syrian issue, Iran's nuclear
