The above table explains how BRICS allocates a priority to existing domains of functionality. The survey covered between 2008 and 2012. Economic and financial affairs held primary importance during BRICS consultations and declarations. The average priority given to economic aspects from 2008 to 2012 was 28.15 percent, and finance went up by 19.67 percent. BRICS started giving importance to political affairs over some time because, in 2008, it was 0 percent, whereas it improved to 15.79 percent in 2012. Trade and development also held significant importance in BRICS consultations. The average priority was 7.16 percent and 7.82 percent, respectively. Further, the other important aspect of the BRICS's consultation was energy, as the average received in that domain was 4.85 percent.

This means that BRICS was also concerned about other problems that would emanate from emerging and developing countries, such as traditional and non-traditional security problems and the menace of terrorism. For the first time in the Yekaterinburg (2009) BRIC Summit, BRICS leaders reiterated no justification for any form of terrorism. It also called for an urgent draft of the UN's 'Comprehensive Convention against International Terrorism.' BRICS leaders declared that they strongly condemned terrorism wherever and in whichever form it originated. Later, the 2010 Brasilia summit underscored the importance of building cooperation among all the countries fighting against a growing terrorist threat to the world. There, they called for it as below:

> We condemn terrorist acts in all forms and manifestations. We noted that the fight against international terrorism must be undertaken with due respect to the UN Charter, existing international conventions and protocols and that the U.N. General Assembly and Security Council resolutions relating to international terrorism, and that the prevention of terrorist acts is as important as the repression of terrorism and its financing. In this context, we urge early negotiations in the U.N. General Assembly of the Comprehensive Convention on International Terrorism and its adoption by all Member States. (Brasilia Summit Declaration 2010)

Furthermore, the 2011 Sanya (China) summit also went ahead by including the widening of a technological threat in global affairs, where the
