Source World Economic Outlook 2011

The IMF report in the *World Economic Outlook 2011* reveals how rising power nations have become sound in economic growth. Table 2.3 explains how the so-called developed countries were in deep trouble during the 2008 global financial crisis and how developing or emerging nations registered impressive trade and service sector improvement at that very point in time. Table 2.3 says that the world trade in goods and services in 2007 was 7.7 percent, in 2008 it was 3.0 percent, in 2009 it was 10.7 percent, and in 2010 it was 12.8 percent. In 2007 in global trade imports, the developed countries' share was 5.2 percent, whereas the emerging nation's share was 13.8. In 2008, the number of developed countries contributing to global imports was 0.6, whereas rising power nations were 9.1. In 2009, the developed countries' import share was −12.4 percent, whereas growing power nations were at −8.0 percent. In 2010, the developed countries' global share was 11.7 percent, whereas the developing countries' share was 14.9 percent.

Furthermore, rising power nations registered an impressive improvement in global exports too. In 2007, developed countries' exports were 6.8 percent, whereas the developing countries' share was 10.2 percent. In 2008, the number of developed countries shared in global exports was 2.1 percent only, whereas developing countries' share was 4.7 percent. In 2009, developed countries' share in global exports was 11.9 percent, but developing countries' share was −7.7. However, in 2010, developed countries' share in global exports was 12.3 percent, whereas developing countries' share was increased and stood at 13.6. Not only were global imports and exports rising, but even the presence of powerful nations was also growing year after year. These countries' share in global GDP also improved drastically in the past. Further, the IMF's World Economic Outlook on 'World Real per Capita Output' says that in Tables 2.4 and 2.5.

Table 2.4 Selected countries GDP growth rate

S. no	Country	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022
1	Brazil	2.7	2.1	−0.3	−4.4	−4.1	0.5	1.0	0.6	4.6	3.0	1.9
2	India	6.3	5.1	6.2	6.8	7.1	5.7	5.4	2.9	−8.7	11.5	5.9
3	Russia	4.9	1.5	−1.1	−2.2	0.0	1.8	2.9	2.1	−3.1	3.8	3.8
