Source BRICS joint statistical publication 2020, p. 38

Note India's unemployment rate is based on the data of Statista.com[15]

The positive aspect of the BRICS is that every BRICS country has a considerable amount of natural and human resources. Therefore, BRICS members should use the resources for the development of their countries. That will, in a way, enhance the stature of the BRICS group in international relations.

Further, Table 2.12 examines the exports of goods and commercial services of the BRICS countries from 2014 to 2019. The data are taken from the BRICS Joint Statistical Publication 2020. However, there is fluctuation in the BRICS members' goods and commercial services trade.

Table 2.12 Value of imports and exports of goods and commercial services (million US$)
