Again, Table 2.13 explains the BRICS population ratio in different phases. The data is taken from the UNCTAD.

Table 2.13 Age structure and dependency ratio of the BRICS population

	Year	Population (Millions)			Dependency ratio (percentage)		Total
		0–14	15–64	65+	Child (0–14)	Old-age (65+)	
BRICS	1950	411	719	49	57.1	6.9	64
	2019	707	2213	296	31.9	13.4	45.3
	2050	574	2226	682	25.8	30.6	56.4

Source UNCTAD Handbook of Statistics 2020, p. 68, https://unctad.org/system/files/official-document/tdstat45_en.pdf

Table 2.14 explains the FDI inflows in the BRICS countries from various sources. It says that FDI has been consistently increasing in the BRICS and contributing to the development of the countries. However, there has been a downslide since 2019 due to several global factors—notably, the United States and China trade war.

Table 2.14 Inflows of FDI (million US$)

Countries	2014	2015	2016	2017	2018	2019
Brazil	97,180	74,718	78,248	70,332		
Russia	22,031	6853	32,539	28,557	8785	31,975
India	45,147	55,559	60,220	60,974	62,001	51,429
China	119,562	126,267	126,001	131,035	134,966	138,135
South Africa	5775	1730	2235	2010	5450	4624

Source BRICS Joint Statistical Publication 2020, p. 168

The positive thing with the group says that the BRICS countries also started spending their FDI's to other countries. Remarkably, the Western countries.
