How the Deal Was Won

Key insiders share their insights on the diplomatic breakthrough of the Indo-US nuclear deal in 2008

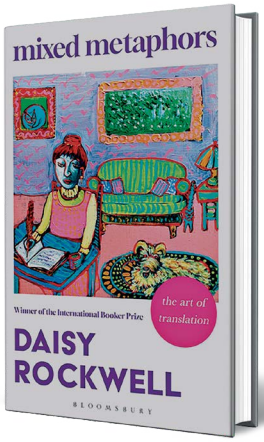

The US-India Nuclear Accord: History, Analysis, and Reflections
Edited by Sumit Ganguly and Dinsha Mistree
STANFORD UNIV. PRESS
$80; 296 pages

"Why don't we have a better relationship with India?" This was the simple question George W. Bush, then campaigning for his first term as US President, put to Condoleezza Rice. Rice explained that India's pursuit of nuclear weapons and refusal to join the Nuclear Nonproliferation Treaty (NPT) was the elephant in the room. Bush looked her in the eye and repeated his query. Years later, that blunt question would see Rice, as Bush's National Security Advisor, play a key role in pushing through the landmark US-India Civil Nuclear Agreement in 2008. The deal would fundamentally alter the bilateral relationship: from estranged democracies to strategic partners.

MIXED METAPHORS: THE ART OF TRANSLATION
By Daisy Rockwell
BLOOMSBURY INDIA
₹499; 184 pages

A WORLD OF WORDS

Mixed Metaphors is a whimsical book by the translator who introduced the Hindi-language writer Geetanjali Shree to the English-speaking world. Daisy Rockwell is also an artist—she has peppered the book with her illustrations. The volume has three sections, the first being the self-explanatory 'Twenty-Two Metaphors for Translations'. Part II—'Five Hair-Raising Copyright Tales'—is tragicomic memoir, while the last—'Conjugations'—is decidedly personal.

TRIBAL AFFAIRS

The PhD thesis of the controversial detainee, Umar Khalid, has finally been published in book form. Focusing on Adivasi society in the Singhbhum region (in southern Jharkhand) during British rule, the book's long 'Introduction' offers contemporary context to the historical material.

FRACTURED COMMUNITIES: ADIVASI HISTORIES AND THE POLITICS OF POWER
By Umar Khalid
JUGGERNAUT
₹499; 400 pages
