associated with protecting their innovations. Through the State Intellectual Property Facilitation Centre, i-Hub Gujarat provides specialised support for patents, trademarks, copyrights, industrial designs, and international filings. Supported by 23 empanelled facilitators and financial assistance of up to ₹5 lakh per startup, the programme has delivered significant outcomes:

- **1,242 patent applications filed, with 344 granted**
- **861 industrial design applications filed, with 660 granted**
- **109 trademark applications filed, with 80 granted**
- **90 copyright applications filed, with 67 granted**

These achievements reflect Gujarat's growing emphasis on innovation ownership and technology commercialisation.

Enhancing Access to Capital and Investment Networks

Many startups successfully develop products and gain initial market traction but struggle to scale due to limited access to growth capital, investor networks, and strategic financial guidance.

To address these challenges, i-Hub facilitates participation in initiatives such as the Startup India Seed Fund Scheme, which offers grants of up to ₹20 lakh and debt based support of up to ₹50 lakh.

Further strengthening the funding ecosystem, the i-Hub Gujarat Startup Seed Fund Scheme has established a corpus of ₹30 crore and aims to support more than 60 DPIIT recognised startups with assistance of up to ₹50 lakh each.

Through a strong network of more than 150 Venture Capital firms and angel networks, regular Investor Meet Ups connect startups directly with funding opportunities.

Enabling Global Market Access

As startups mature, the challenge shifts from local expansion to global competitiveness.

The proposed Global Startup Exposure Programme, with an outlay of ₹10 crore over three years, aims to support around 200 startups through participation in international exhibitions, trade fairs, accelerator programmes, and business networking platforms. Assistance of up to ₹6 lakh per startup will cover travel, exhibition participation, business matchmaking, and related expenses.

Beyond Funding: Building a Complete Ecosystem

Funding alone does not build successful startups. Entrepreneurs require infrastructure, mentorship, industry access, and networks.

i-Hub Gujarat provides physical and virtual incubation, co working facilities, workshops, bootcamps, and access to more than 300 mentors from industry, academia, technology, and investment domains.

Measuring Impact Across the Innovation Ecosystem

i-Hub
(A Gujarat Government Enterprise)

The impact generated by i-Hub Gujarat demonstrates the scale of its contribution to Gujarat's entrepreneurial landscape.

KEY ACHIEVEMENTS

- Startups Incubated **750**
- Revenue generated **₹690** Crore
- Private Funding Facilitated **₹459** Crore
- Employment created more than **4,000** jobs
- Women Led Startups Supported **230** (30 pecent)
- Districts Covered **23**
- Exhibitions Participated in more than **150**
- Startups showcased more than **500**
- Investors engaged more than **150**
- Co working seats allocated **395**

Through initiatives such as **WEstart,** i-Hub has expanded access to **funding, mentorship, and networks** for women entrepreneurs.

Research collaborations, faculty capacity building initiatives, and technology partnerships further strengthen the ecosystem.

The institution collaborates extensively with industry bodies including the Confederation of Indian Industry, Federation of Indian Chambers of Commerce and Industry, regional chambers of commerce, and sector specific associations. International partnerships with organisations such as hub.Brussels, the British High Commission, the Indo American Chamber of Commerce, mLab Africa, and global accelerators provide startups with access to global markets and business networks.

Driving Sector Focused Innovation and Strategic Partnerships

Sector specific acceleration programmes have become an important component of i-Hub's ecosystem development strategy.

Key initiatives include TattvaX with Sanchi Connect supporting 34 DeepTech startups, Samriddhi with Fundenable supporting 38 startups across sectors, Saksham with Build3 supporting 25 social impact enterprises, and Sanjeevani with India Accelerator supporting 37 healthcare startups.

Complementing these initiatives is the Startup Conclave, i-Hub Gujarat's flagship platform organised in collaboration with DPIIT and Startup India. The 2023 and 2025 editions attracted 12 unicorns, more than 150 venture capital funds, and 10 global accelerator organisations. The event facilitated investment commitments worth ₹378.35 crore and resulted in the signing of 134 Memoranda of Understanding, reinforcing Gujarat's growing stature as a destination for innovation and entrepreneurship.

Collaborating with Government to Drive Innovation

A defining feature of i-Hub Gujarat's model is its ability to connect startups with public sector challenges and opportunities. Collaborations with Gujarat Urja Vikas Nigam Limited, Gujarat Livelihood Promotion Company, Ahmedabad Municipal Corporation, State Health System Resource Centre, and agriculture sector agencies have enabled startups to pilot solutions, address real world challenges, and participate in innovation driven governance initiatives. These partnerships accelerate institutional adoption of innovation.

Democratising Innovation Through Regional Inclusion

Through its Hub and Spoke model, i-Hub Gujarat has established a statewide presence across all 23 districts. Regional centres in Surat, Rajkot, Mehsana, and Vadodara provide entrepreneurs with access to incubation infrastructure, mentoring, funding opportunities, and ecosystem support.

This decentralised approach is helping democratise entrepreneurship by ensuring that talent and innovation can emerge from every part of the state.

Advancing Gujarat's Vision for a Knowledge Driven Economy

As India transitions towards a knowledge driven economy, institutions that nurture innovation and entrepreneurship will play an increasingly important role.

Through policy support, funding, mentorship, partnerships, and market access, i-Hub Gujarat has created a scalable innovation model.

By enabling innovators to transform ideas into enterprises, it is helping build a more inclusive and innovation driven economy while contributing to India's Viksit Bharat 2047 vision.
