MASTER OF THE MESSAGE

More than six decades after its founding, IIMC is blending its rich legacy with AI, innovation and entrepreneurship to prepare the next generation of media and communication professionals

By **AVISHEK G. DASTIDAR**

Established in 1965, the Indian Institute of Mass Communication (IIMC) has trained more than 9,200 students and produced generations of journalists, communication professionals and media leaders. As the media industry undergoes one of its most significant technological transformations, the institute is now positioning itself at the forefront of the next phase of change.

The clearest example is the launch of the first-of-its-kind AIME (AI in Media and Entertainment) Academy, an initiative designed to familiarise students with artificial intelligence, synthetic media tools and algorithm-driven systems that are reshaping content creation, distribution and newsroom operations. The idea is to ensure that tomorrow's media professionals understand not only storytelling and reporting, but also the technologies reshaping both.
