Era University

Begin Your Journey with Era University

Established in 2016, Era University (EU) has steadily carved a distinctive identity among India's leading private universities, built on the conviction that education must be as much about character as it is about competence. At its heart lies a multidisciplinary, learner-centric philosophy that weaves together academic rigour, value-based learning, and real-world professional preparation.

Aligned with the National Education Policy 2020, EU places emphasis on flexibility, interdisciplinary thinking, and skill-based education. Its curriculum is continuously strengthened through meaningful collaborations with academic institutions and industry partners, bridging the gap between theoretical knowledge and the demands of a rapidly evolving world.

Central to the University's vision is a commitment to healthcare education of the highest global standard. Era's Lucknow Medical College and Hospital (ELMCH) stands as its flagship institution, equipped with advanced medical technology and shaped by a future-focused approach to clinical training and healthcare practice.

Drawing on over two decades of educational legacy, EU integrates modern, technology-enabled learning across a broad academic canvas. Programmes in Biotechnology, Computer Science, Nutrition, Liberal Arts and Sciences, and Health Sciences are designed not merely to inform, but to cultivate intellectual depth and professional mastery.

The wider academic ecosystem, encompassing ELMC&H, Era's College of Nursing, Era's Institute of Allied Health Sciences and Research, and Era's College of Pharmacy, operates within the Knowledge, Skills, and Attitude (KSA) framework. This unified approach ensures that every graduate emerges not just qualified, but thoughtful, adaptable, and ready to contribute meaningfully to society.

The University's Training and Placement Cell further strengthens this vision through strong industry connections and successful placements in reputed healthcare, pharmaceutical, IT, and retail organizations. Through placement drives, counselling, workshops, seminars, and industrial visits, the Cell continuously enhances students' employability, professional skills, and industry readiness.

Learning at EU is enriched by experienced faculty, extensive research exposure, and hands-on opportunities that sharpen problem-solving, nurture innovation, and build resilience. Backed by modern infrastructure, strong academic systems, and a secure and vibrant campus, Era University is more than an institution of learning. It is a launchpad for lives of purpose and impact.
