their exposure to various disciplines," says Prof. Jain Mathew, dean. The iMBA, whose first batch was inaugurated in June, therefore combines core management studies with subjects such as Public Policy, Sociology, Psychology, Media and Philosophy. "In the third year, students get more exposure to management courses, and when they come to the fourth and fifth years, it will be specialisation," he says.

Significant changes have also been made to the core three-year BBA programme. One of the most notable is the wider adoption of the case-study method from the second year onwards, based on *Harvard Business Review* case material. The method relies on quick case studies of four to five pages rather than large cases running into 30 to 40 pages. "Another transformation that has happened is that we have started using research as a methodology for learning," says Mathew. Assignments are designed to ensure that students conduct interviews, videograph them and then present an analysis. This year, about 30 per cent of BBA third-year students have opted for the new BBA Honours course.

There are skills-learning courses every semester, beginning with soft skills such as communication, team development and leadership in the first year, before moving on to business analytics platforms such as Excel and Power BI, and eventually AI tools. Though coding is not essential, all BBA students learn the basics of languages such as Python, Mathew says. "Bengaluru being a place with scope for sports management, entertainment and gaming industries, all this gives them a solid skill that they can further develop," says Anuradha R., head, BBA programme.

The school also has a separate three-year BBA Decision Science, whose course material, Mathew says, overlaps with engineering topics. Students are trained on several analytical tools and undertake a one-year apprenticeship in industry. Other new initiatives in the coming year include expanding the range of industry collaborations, says Anuradha. "This year, we are collaborating with Deloitte and Zell Education at our Kengeri campus for a programme where we apply finance with fintech."

Demand for BBA students is high, Mathew says. Recruiters begin visiting the campus from October onwards, and the placement process is usually completed by February. "Beyond that, if companies come, there likely won't be many students," he says. That is perhaps the ultimate report card for the institution. ■

TOP 5 MOST IMPROVED COLLEGES BBA

RANK	COLLEGE	CITY	RANK 2026	RANK 2022
1	SCHOOL OF BUSINESS AND MANAGEMENT, CHRIST (DEEMED TO BE UNIVERSITY)	Bengaluru	2	4
2	SRI GURU GOBIND SINGH COLLEGE OF COMMERCE	New Delhi	13	22
