SRM UNIVERSITY-AP: DRIVING INDIA'S AI AND QUANTUM TECHNOLOGY TRANSFORMATION

SRM University-AP, Amaravati, has positioned itself as the strategic springboard on which India's Quantum future surges. By establishing India's first and only Quantum Reference Facility (QRF) on campus, SRM University-AP aligns with the goals envisioned by the National Quantum Mission, strengthening India's global quantum ambition to emerge as a leader in emerging technologies.

Being the founding academic partner of the Andhra Pradesh government's Amaravati Quantum Valley project, SRM University-AP was chosen as one of the partners that houses the Amaravati Quantum Reference Facilities (AQRF), India's first indigenous, open-access quantum computing platform.

SRM AP also integrates quantum technologies and quantum computing into its academic curricula to train students in science, engineering, and computer science, nurturing a highly skilled workforce to meet future technological needs.

In addition to SRM University-AP's pioneering initiatives in quantum technology, computing research, and education, the university spearheads AI education and research to strengthen its vision of disseminating transformative education.

The landmark collaboration with the world-renowned Carnegie Mellon University (CMU) School of Computer Science promotes cutting-edge AI education through innovative technology solutions across all disciplines and courses.

Central to this partnership is a common ambition: to build a thriving ecosystem that emphasises transformative research, develops world-class talent, and drives the rapid advancement of AI-powered technologies.

By leveraging Carnegie Mellon University's expertise in AI and the bold vision behind the Amaravati Quantum Valley initiative, SRM University-AP stands as a pivotal contributor, with its commitment to academic excellence, drive for innovation, and lasting impact on India's AI and quantum landscape.

VIDYAVARDHAKA COLLEGE OF ENGINEERING: AN OUTSTANDING ECOSYSTEM FOR HOLISTIC GROWTH

Vidyavardhaka College of Engineering (VVCE), established in 1997 in the heritage city of Mysuru, is one of Karnataka's premier engineering institutions. It functions under the aegis of Vidyavardhaka Sangha (VVS), founded in 1949 by visionaries Sahukar Channaiah and K. Puttaswamy (former minister from Karnataka) with the mission to provide quality education to all sections of society. Today, VVS thrives under the dynamic mentorship of Gundappa Gowda (President), Shivalingappa B (Vice President), Er. P. Vishwanath (Secretary), and Shrishaila Ramannavar (Treasurer). Vidyavardhaka College of Engineering is led by Sadashive Gowda B, a dynamic principal with global academic and industry experience and served as Dean at VTU, Belagavi. VVCE is an autonomous institute approved by AICTE and affiliated to VTU, Belagavi.

All eligible UG programs are NBA-accredited. VVCE holds NAAC 'A' grade, QS I-Gauge Gold Rating, and 'Institute of Happiness' award. VVCE, ranked among India's top 200 engineering institutes and listed in NIRF 2022. VVCE, offers 6 UG, 5 PG (MBA, MCA, Civil, Computer Science and Electronics & Communication) and 9 Research centres offering Ph.D programs with over 5700 students and more than 290 faculty out of which 133 faculty are with PhDs. It delivers quality engineering and management education through committed, passionate educators. As a result, VVCE is known in the state as an institute with some of the best teaching-learning and research ecosystems. VVCE's unique teaching pedagogy fosters industry ready leaders through a continuously updated curriculum that balances theory and practice. Strong collaborations with industries and EdTech companies enhance student engagement and career readiness. Budding entrepreneurs benefit from a free on-campus incubation facility. With 35 student-led clubs spanning entrepreneurship, public speaking, arts, culture, and sports, students have ample opportunities to explore and refine their talents. The institute boasts state-of-the-art infrastructure, departmental centres ofexcellence, and affordable on campus hostel facilities for both boys and girls. With state-of-the-art infrastructure, on-campus hostels, and a proactive training & placement cell, VVCE ensures students are industry-ready from day one. Over 250 companies visit annually for placements, offering numerous internship and job opportunities. VVCE continues to shine as a rising star in Mysuru, where innovation is a daily mantra.
