"ENGLISH ON THE EDGE: SURVIVE? EVOLVE? THRIVE?"

There has never been a better time to know English. There has never been a more challenging time to teach it. Artificial intelligence can draft essays in seconds. Students move effortlessly between languages and platforms. Reading habits are changing, classrooms are becoming increasingly multilingual, and universities are rethinking the place of the humanities.

English is not in decline. It is at a threshold. The question is no longer whether it will survive, but how it will evolve and thrive. More importantly, what remains distinctively human about learning and teaching a language when machines can read, write, translate and even emulate conversation?

No teacher or institution can answer that question alone. It demands a community willing to experiment, debate, collaborate, and imagine the future together.

For over five decades, the English Language Teachers' Association of India (ELTAI) has nurtured that community through webinars, workshops, publications, mentoring, classroom-based research, fellowships, research incubation, reading initiatives, and professional development. Its Annual Conference is where these conversations converge and new ideas find their first audience.

From 7–10 October 2026, nearly 1,000 educators, researchers, publishers, writers, school leaders, policymakers, students, and edtech innovators will gather at MIT Art, Design and Technology University, Pune, for the 20th International and 56th Annual Conference of ELTAI, themed "English on the Edge: Survive? Evolve? Thrive?" More than an academic conference, it is a meeting place for ideas, collaboration, innovation, and professional renewal.

A defining feature this year is READFEST, an exhibition-cum-festival of books, readers, and reading. Bringing together around sixty schools with students, parents, authors, teachers, and publishers, READFEST celebrates reading not as an examination skill, but as a lifelong habit and a shared cultural experience. It reminds us that the future of English education often begins with a child opening a book.

English may be standing at the edge. But edges are where new journeys begin. This October, Pune will bring together those who are not merely discussing the future of English education but are essentially helping to create it.

SHAPING TOMORROW'S BUSINESS LEADERS THROUGH EXPERIENTIAL LEARNING: MBA AT S.A. SCHOOL OF MANAGEMENT, CHENNAI

The MBA programme at S.A. School of Management, approved by AICTE, is thoughtfully designed to nurture competent, innovative, and socially responsible management professionals. Guided by the vision ***"Enrich – Empower – Evolve",*** the institution focuses on empowering future leaders by transforming them into sustainable solution providers capable of meeting global business challenges. **State-of-the-art infrastructure** supported by interactive learning boards and smart digital classrooms enhances collaborative and innovative teaching–learning practices, ensuring a dynamic and student-centric learning environment.

The programme offers **Dual Specializations** across emerging and core management domains including Marketing, Finance, Human Resource Management, Logistics & Supply Chain Management, Business Analytics, Entrepreneurship & Family Business, Production & Operations Management, and Tourism & Hospitality. This multidisciplinary approach enables students to gain diversified expertise aligned with industry requirements.

A major highlight of the MBA curriculum is its emphasis on **Experiential and Activity-Based Learning,** supported by innovation, incubation, and startup initiatives. Well-established **Business Labs and Centres of Excellence** provide practical exposure, while strong **Industry Connect** ensures students gain real-time corporate insights through internships, projects, and professional interactions. Professional body affiliations further strengthen networking opportunities and industry relevance. The institution is supported by **dynamic faculty members** possessing rich experience in industry, teaching, and research. Strategic **MoUs with industries** enhance collaborative learning opportunities. Students actively participate in **social immersion programmes and outbound training,** fostering leadership qualities, teamwork, and social responsibility.

Technology-driven value additions form an integral part of the programme. Certification courses conducted in association with industries and international universities enhance professional competence. The **NSmart Lab for simulated trading** and advanced **simulation laboratories** expose students to real-world business environments in finance, marketing, operations, and strategy, strengthening analytical and decision-making capabilities.

Academic delivery is further enhanced through the association through business apps, promoting digital learning and business awareness.

With **Professors of Practice** bringing real-world expertise into classrooms and placement opportunities ranging up to **8 LPA,** the MBA programme ensures career readiness and professional success. Through innovation-driven learning, global exposure, and industry-integrated training, S.A. School of Management continues to shape confident, skilled, and future-ready business leaders prepared to excel in the evolving global economy.
