No.1* All India Institute of Medical Sciences (AIIMS) New Delhi

AT THE PINNACLE OF MEDICINE

As medicine embraces AI and digital technologies, AIIMS New Delhi is blending innovation with clinical rigour to remain the benchmark for training future doctors

By **SONALI ACHARJEE**

For generations of aspiring doctors, the All India Institute of Medical Sciences (AIIMS) New Delhi has stood at the pinnacle of medical education in India. Yet its enduring strength lies not just in its reputation, but in its ability to adapt. As artificial intelligence, data analytics and digital technologies transform healthcare, AIIMS is embracing new frontiers while staying true to the fundamentals that has come to define it: clinical rigour and patient-centred care.

Ask almost any AIIMS graduate what sets the institution apart, and the answer is often the same: the patients. With one of the highest patient loads in the country, students and residents are exposed to an extraordinary range of diseases, clinical conditions and treatment pathways. The sheer volume and complexity of cases provide a level of clinical experience that few institutions can match. The learning curve is steep and the workload demanding, but it is also one of the reasons AIIMS graduates are among the most sought-after medical professionals.

At the same time, the institute is adapting to a healthcare landscape increasingly influenced by technology. AI-powered diagnostics, predictive analytics and digital decision-support tools are becoming part of contemporary medical practice, and AIIMS is ensuring that students are equipped to work with these emerging technologies. But Dr Nikhil Tandon, the institute's director and a noted endocrinologist, says that the emphasis remains on using technology to strengthen clinical reasoning rather than replace it. "AI will undoubtedly become an important tool for doctors," he says, "but medicine, ultimately, remains a human profession. The best doctors will be those who know how to use AI intelligently without

GURUSPEAK

"At AIIMS New Delhi, community medicine, research and patient care are integrated, thus preparing compassionate doctors who combine science, social understanding and responsible use of emerging technologies to improve healthcare outcomes for patients"

DR NIKHIL TANDON
Director, AIIMS New Delhi
