No.1*

Maulana Azad Institute of Dental Sciences
New Delhi

HARDIK CHHABRA

separate from clinical practice, the institute is increasingly integrating it into everyday learning. "Students can expect a more research-intensive, innovation-driven and clinically enriched environment that prepares them to become competent dentists and future researchers, innovators, educators and leaders in oral healthcare," says Prof. (Dr) Arundeep Kaur Lamba, director-principal, MAIDS.

Research is becoming a larger part of the undergraduate experience. Students are being encouraged to participate in faculty-mentored projects, ICMR (Indian Council of Medical Research) Short-Term Studentship (STS) programmes, clinical studies and interdisciplinary collaborations.

What makes MAIDS particularly exciting in 2026 is that students are no longer limited to learning how existing dental technologies work—they are increasingly getting opportunities to help create the next generation of them. Whether developing affordable diagnostic tools, validating new technologies in clinical settings, or collaborating with engineers and medical researchers,

GURUSPEAK

"The institution's greatest strength is its shared sense of belonging and commitment to excellence, ethics, empathy, innovation and service, nurturing skilled, compassionate clinicians and future leaders in dental education"

PROF. (DR) ARUNDEEP KAUR LAMBA
Director-principal, MAIDS
