

The New Education Policy 2020 was a step towards breaking the old mould to make education more flexible, professional and fulfil the mission of making India self-reliant through education, which are essentials for nation-building. The future belongs to universities that can seamlessly blend tradition with technology, knowledge with application and learning with societal impact.

stage and are generating revenue while creating tangible impact. Supporting this entrepreneurial culture is the Galgotias Innovation Fund, a dedicated INR 10 crore initiative that provides funding, mentorship, industry access, and growth opportunities for student-led ventures, helping young innovators scale their ideas into sustainable businesses. These investments are translating into tangible outcomes. In 2026 alone, eighteen Galgotias students were recognised in Apple's prestigious Swift Student Challenge, following ten winners in 2025, reinforcing the University's growing reputation as one of India's leading hubs for student innovation, app development, and technology talent.

Galgotias University has invested significantly in building a future-focused innovation ecosystem. From high-performance AI computing capabilities powered by NVIDIA DGX H200 to the iOS Development Centre powered by Apple and Infosys, students have access to advanced platforms that enable research, experimentation, product development, and technology-led innovation. Today, more than 58 students-developed applications are live on the Apple App Store, reflecting the university's emphasis on hands-on innovation and real-world technology creation.

OP Jindal Global University for instance has created a dynamic entrepreneurial ecosystem through its IDEATE Lab, which supports startups, innovators and family businesses through mentoring, education and ecosystem partnerships. A notable initiative under the IDEATE Lab is the Family Business Centre, which helps business families strengthen governance, leadership and succession planning while enhancing long-term sustainability.

Industry-Integrated Learning: Bridging Campus and Careers

Galgotias University under its CEO Dr. Dhruv Galgotia, has emerged as a hub of industry-integrated learning. Through Centres of Excellence established in collaboration with global industry leaders and complemented by internships, live projects, mentoring programmes, and experiential learning opportunities, students gain hands on exposure to emerging technologies, workplace practices, and future-ready skills. The University has built strong industry and innovation partnerships with organisations including Apple, Infosys, Intel, Cisco, Tata Technologies, L&T EduTech, Capgemini, and Salesforce, while continuing to strengthen its global academic engagement and startup ecosystem.

The university recently inaugurated the IBM software lab for emerging technologies and India's first advanced electric vehicle centre by Larsen & Toubro at it's campus.

This strong industry-academia integration translates into exceptional career outcomes. For the graduating class of 2026, Galgotias University facilitated more than 5,500 placement offers from over 1,250 recruiters, reflecting the university's emphasis on employability, professional readiness, and career success.

Reinventing Classrooms Through Student-Centric Learning

Universities are increasingly shifting from passive instruction to active, collaborative and experiential learning models. Initiatives such as the Galgotias Student-Centric Active Learning Ecosystem (G-SCALE) have redefined traditional education models, fostering interactive and collaborative
