

PROF. DR. C. RAJ KUMAR
Vice Chancellor, O.P. Jindal Global University

learning environments. This project aims to redefine classroom experiences through active, collaborative, and technology-enhanced learning.

G-SCALE has transformed every classroom into an interactive learning environment that promotes collaboration, critical thinking, creativity, problem-solving, and active participation, redefining the learning experience for a new generation of students. The university's emphasis on holistic development extends beyond academics and innovation. At the World Yogasana Championship 2026, which brought together 522 athletes from 79 countries, Galgotias students secured five gold medals across individual and team categories, demonstrating excellence on the global stage and reinforcing the university's commitment to nurturing well-rounded individuals.

Multi-campus institution such as SRM Institute of Science and Technology, a deemed to be university, has expanded access to education for students. The institution goes beyond classroom to offer an experiential experience to students by providing a diverse range of programs from technology, engineering, medicine, law, nursing, architect, management and more.

Global Learning Through International Collaborations
In an increasingly interconnected world, universities are focusing on internationalisation as a key pillar of educational excellence. The Kalinga Institute of Industrial Technology (KIIT), Odisha, has built a truly global learning ecosystem with students representing more than 65 countries. KIIT is partnering with leading global companies for career success of its students. This multicultural environment enriches learning experiences while preparing graduates to thrive in diverse global workplaces.

Galgotias University is increasingly expanding its global footprint through international collaborations, research partnerships, student mobility initiatives, and immersive learning opportunities. These engagements provide students with international exposure while enabling the university to bring global best practices, research perspectives, and cross-cultural learning experiences into the classroom.

As India strengthens its position as a global knowledge economy, Galgotias University is contributing by building an ecosystem that combines academic excellence, innovation, entrepreneurship, research, industry engagement, and international collaboration to prepare future-ready graduates and leaders.

Shiv Nadar University on the other hand has strengthened its global outlook through its collaboration with Arizona State University (ASU), offering innovative 2+2 programmes in Computer Science and Business. These initiatives provide students with international exposure and pathways to global careers.

DR. DHRUV GALGOTIA
CEO, Galgotias University

SRM Institute of Science and Technology has also expanded international engagement through global partnerships, industry collaborations and academic exchanges, helping students gain broader perspectives and cross-cultural competencies.

Today, universities are increasingly integrating hi-tech technologies like AI, Big Data, and ML into their operating systems. The New Education Policy 2020 was a step towards breaking the old mould to make education more flexible, professional and fulfil the mission of making India self-reliant through education, which are essentials for nation-building.

The future belongs to universities that can seamlessly blend tradition with technology, knowledge with application and learning with societal impact. By creating future-ready graduates equipped with skills, values and global perspectives, these institutions are not only transforming higher education but also contributing meaningfully to India's journey towards becoming a knowledge-driven economy.

Multi-campus institution such as SRM Institute of Science and Technology, a deemed to be university, has expanded access to education for students. The state-of-art infrastructure, industry interaction, internship and a highly qualified and experienced faculty groom the students to unleash their full potential.
