

Hands-on learning at the Mechatronics Lab, IIT Delhi

ARUN KUMAR

GURUSPEAK

"Our technical clubs, workshops and makerspaces (collaborative work spaces) encourage hands-on experimentation and innovation, helping produce engineers who communicate effectively, think across disciplines and develop solutions with meaningful global impact for society"

PROF. SOMNATH BAIDYA ROY
Dean, Planning, IIT Delhi

progressing to postgraduate and doctoral studies. The programme widens opportunities for talented students while creating a larger pipeline of future researchers in India.

The institute is also deepening its global engagement. A new joint degree with Paris's Sorbonne University in healthcare and medical technologies adds to exisiting partnerships with universities in Australia, Taiwan and elsewhere. IIT Delhi has also doubled its international postgraduate intake, reinforcing its ambition to become a more globally connected campus where international exposure is embedded through joint degrees, student exchanges and collaborative research.

Curriculum reform is central to

SHARDA UNIVERSITY
Beyond Boundaries

India's truly
AI-enabled
Campus

Among India's Top Universities with Highest Patent Success Rate. An Impressive 26% Success Rate

- Compulsory AI learning for both tech & non-tech students
- Exposure to next-gen supercomputer for AI research
- Global internship opportunities in AI in the US, Germany, France & Mexico.
