

SESHADRIPURAM INSTITUTE OF TECHNOLOGY (SIT)

Seshadripuram Institute of Technology (SIT), located amidst various industries on a ten acres area in Kadakola Industrial Area of Mysuru. SIT is a new generation Engineering institute that empowers graduates to come out as Skilled Technology leaders of tomorrow.

The Kadakola Industrial Area is a major, rapidly expanding industrial and logistics hub which is well connected to Mysore City. SIT is the brainchild of a well-known respected 96-year old prestigious Seshadripuram Educational Trust (SET), Bangaluru, which is running 34 institutions in three districts of Karnataka. This experience of SET has helped SIT which took its first step in 2024 and has grown from strength to strength. The Institution is approved by AICTE, New Delhi and is affiliated to Visvesvaraya Technological University (VTU), Belagavi, Karnataka. The institution has highly experienced and research-oriented faculty supporting and training students to face the converging technologies.

The campus redefines technical education for the modern era by blending advanced laboratories and skill-enhancing learning spaces into a student-friendly environment. At SIT, experiential learning by students is the mission which encourages logical thinking among students and brings confidence in solving problems. The campus features a dedicated Makers Lab, which is fully equipped with FDM 3D printers, CNC machines, soldering stations, computer aided design software which helps in designing mechanical and electronic systems. Our students in first year itself take advantage of Maker's lab. They design and implement projects beyond curriculum using 3D printers, CNC machine, microcontrollers, and develop IoT (Internet of Things) devices. The idea is that students should conceive, design, implement and operate prototypes. This helps in troubleshoot hardware failures and refine mechanical or electrical designs before final deployment.

To- day employers are looking for freshers who can communicate, prepare error free documents, convince the customers and have aptitude of logical reasoning. SIT has not only created Language Lab to refine LSWR skills but also Teamwork & collaboration along with technical knowledge. The institute provides high level placement training from the first year itself so that students are ready for placement by the time they reach final year. Eminent professionals from the industry are invited to provide industry-specific training which enhances placement opportunities.

The Central library's ambience attracts faculty and students to visit and take full advantage of books and journals as well as expansive digital library. SIT believes that extracurricular activities help in holistic development of a student. There are various clubs, professional body memberships like IEEE, etc. and NSS. Sports department facilitates indoor sports facilities, a gymnasium, and yoga centre for overall wellness and personality development. A dedicated Entrepreneurship Development Cell (EDC) has been started and startup incubator under Institutional Innovation Council (IIC). EDC & IIC organizes bootcamps, hackathons, and pitch competitions to empower student entrepreneurs to refine their ideas.

For out state students the college provides secure and well-furnished hostel for girls and boys. SIT operates a dedicated transportation facility for students. The transport network covers Mysuru city and nearby taluks, ensuring a safe and punctual commute to campus. Through strategic tie-ups with AWS Academy, Infosys Springboard, and IBM, Students pursue certification programs in cutting-edge domains and professional programming at no extra cost. In addition to certifications, as per VTU guidelines interested students are counselled to pursue credit-based minor degrees in emerging fields alongside their core B.E. programs to fit industry demands.

SIT offers six high-demand B.E Programs:

1. Artificial Intelligence and Machine Learning (AIML)
2. Computer Science and Engineering (CSE)
3. Information Science and Engineering (ISE)
4. Electronics and Communication Engineering (ECE)
5. Electrical and Electronics Engineering (EEE)
6. Mechanical Engineering (MECH)
