SAI UNIVERSITY INDIA'S FIRST INTERNATIONAL UNIVERSITY

As artificial intelligence, entrepreneurship, and interdisciplinary innovation reshape every sector of society, universities must prepare students not only for today's careers but also for the opportunities and challenges of an unpredictable future. Established by Shri K.V. Ramani, Founder and Chancellor of Sai University, Chennai is also co-founder of the National Association of Software and Service Companies (NASSCOM) and one of the pioneers of India's IT revolution. Sai University in Chennai was founded with the vision of providing global higher education model in India, to become the First International University from India.

Inspired by the principles of global liberal education, Sai University, Chennai combines academic rigor with multidisciplinary learning, research, innovation, entrepreneurship, and experiential education to nurture intellectually curious, ethically grounded, and globally competent graduates. Students are encouraged to explore diverse disciplines, engage in real-world problem-solving, collaborate across fields, and develop the critical thinking, creativity, and leadership skills essential for a rapidly evolving world. By integrating the depth of traditional scholarship with the flexibility demanded by emerging technologies and industries, Sai University is creating a transformative learning ecosystem where future scientists, entrepreneurs, policymakers, artists, and innovators are empowered to shape society and lead meaningful changes on a global stage.

Even before the introduction of the National Education Policy 2020, Sai University had established itself as India's pioneering liberal education university, offering more than 50 programs across eight schools, including Artificial Intelligence, Computing and Data Science, Business, Law, Technology, Media, Arts and Sciences, and Allied Health Sciences. Designed as a truly multidisciplinary institution, Sai University empowers students to customize their education through flexible major-minor combinations, interdisciplinary pathways, distinctive electives, and audit courses aligned with emerging industries and societal needs.

Experiential learning lies at the heart of the Sai University experience. Moving beyond rote memorization and examination-driven education, students learn through research, industry projects, internships, presentations, innovation challenges, collaborative problem-solving, and continuous assessment that develops critical thinking and real-world competencies.

Equally distinctive is Sai University's strong culture of undergraduate research. From their first year, students actively participate in faculty-led research, interdisciplinary collaborations, startup incubation, entrepreneurial ventures, and industry engagement, cultivating the curiosity, creativity, and leadership essential for success in a rapidly evolving global landscape.

Driving this transformative vision is Prof. Ajith Abraham, Vice Chancellor of Sai University and an internationally acclaimed artificial intelligence scientist. Recognized among Stanford University's top 2% scientists worldwide, Prof. Abraham brings decades of global academic leadership, pioneering research, and institutional excellence to Sai University, Chennai. Under his leadership, Sai University is rapidly emerging as a hub for cutting-edge research, interdisciplinary innovation, global partnerships, entrepreneurship, and technology-driven learning—cultivating an academic ecosystem that prepares students to lead in an AI-powered world of the future. Together, Shri K.V. Ramani and Prof. Ajith Abraham are not simply building a university, they are shaping a new paradigm for higher education in India. By seamlessly integrating the philosophy of liberal education with international faculty and curriculum, world-class research, industry engagement, and innovation, Sai University is nurturing the next generation of thinkers, creators, entrepreneurs, and leaders.

Sai University is committed to becoming India's First International University, setting new benchmarks in governance, academic excellence, multidisciplinary learning, transformative education with global partnerships and extracurricular activities, to prepare students to become Global Citizens of the emerging technology world.
