A class in progress at AIIMS Delhi

MD in Hospital Administration, MSc Nursing, Master's and PhD Biotechnology courses, alongside doctoral and fellowship programmes. Importantly, the curriculum is continually revised to keep pace with changing healthcare needs and advances in medicine, ensuring that residents are trained in contemporary clinical practice rather than relying on static textbooks.

Perhaps the institute's greatest strength is its unparalleled clinical exposure. "As one of India's busiest tertiary-care centres, AIIMS attracts patients from every state, many with rare, complex or advanced diseases that residents are unlikely to encounter elsewhere," says Dr Nikhil Tandon, the acting director of AIIMS New Delhi.

This provides postgraduate students with experience across an extraordinary range of conditions, from routine illnesses to those needing cutting-edge transplant medicine, advanced oncology cases, genetic disorders and highly specialised surgical procedures.

"Research is equally central to postgraduate life," adds Dr Tandon. Unlike at many medical colleges, where research remains largely thesis-driven, AIIMS encourages residents to engage with multidisciplinary research teams, clinical trials, translational medicine and labora-

GURUSPEAK

"Residents learn by treating rare and complex cases while contributing to research that directly informs clinical practice and public health"

DR NIKHIL TANDON

Acting Director, AIIMS New Delhi
