

TESLA MODEL Y L

Tesla has expanded its line-up in India with the Model Y Long Wheelbase, which is also the first to get AWD (dual-motor) configuration here. The car is likely to have a 90 kWh battery pack, with total power output in the vicinity of 500 bhp. Tesla claims a 0-100 kmph time of just 5 seconds and a range of 681 km on a single charge. Every single design element is shared between the standard and long wheelbase version, but the roofline is quite different, with a more pronounced bow above the rear section, along with longer doors. The Model Y L is priced at Rs 61.99 lakh (ex-showroom).

HERO'S FLEX FUEL BIKES

Hero MotoCorp has launched the flex-fuel versions of its best-selling Splendor+ and HF Deluxe motorcycles, becoming the first manufacturer to do so in the mass-market 100 cc segment. The new motorcycles can run on ethanol-petrol blends ranging from E20 to E85 and will be available in Delhi and select regions of Maharashtra from July 2026. The HF Deluxe Flex Fuel has been priced at Rs 72,792 (ex-showroom), while the Splendor+ Flex Fuel costs Rs 82,710 (ex-showroom). Both motorcycles are powered by Hero's 97.2 cc single-cylinder engine but have been upgraded for ethanol blends. The motorcycles also have revised ECU calibration, upgraded fuel-system components, a dedicated fuel pump and a secondary fuel filter. Hero states the bikes produce 8.57 bhp when running on E85 fuel.
