CWG 2026

A SEASON OF FIRSTS

Despite a leaner Games that left out many of India's strongest sports, the contingent excelled across disciplines

By **SUHANI SINGH**

Of the 74 nations and territories competing at the Glasgow Commonwealth Games (CWG), India finished fourth, with 39 medals, behind Australia, England and Canada—the same position as in the previous edition in Birmingham, albeit with a considerably smaller haul. Following Victoria's withdrawal as host over spiralling costs, Glasgow 2026 was staged in a leaner format, with just 10 sports compared to Birmingham's 19, leaving out several of India's traditional strengths, including wrestling, squash, cricket and hockey.

Yet the Indian contingent rewrote its own record books across disciplines. Expect that momentum to carry into 2030, when the Games come to Ahmedabad, with more of India's favoured sports likely to feature—perhaps even helping eclipse the record haul of 101 medals at the 2010 Games in New Delhi.
