

A Bridge across Forever

History serves as blueprint for many a creative process. After all, hindsight is perfect sight. So, with one eye on the rear view mirror and one on the road ahead, the new Joia de Baume & Mercier M0A10850 is a diamond encrusted ode to a historical timepiece from the 1980s. The design comes to life in an elegant, feminine, and decidedly contemporary rendition. The silvery dial, criss-crossed with satin-brushed finishes, echoes its steel flattened link strap and its bezel, hedged by 40 brilliant-cut diamonds. The dainty 28 mm diameter underlines the soft, rounded curves of its distinctive feminine credentials that hark at authentic self-expression. It is this delicate, but bright showcase of confident femininity that lifts the timepiece from mere adornment to display a playful hint of defiance, with a style expression that is both soft and bold. History is not just past perfect but future ready.
