

NARENDRA MODI
Prime Minister

DR. MOHAN YADAV
Chief Minister of M.P.

MADHYA PRADESH'S DECISIVE LEAP TOWARDS HEALTH AND EMPOWERMENT

Advancing Healthcare through Innovation and Excellence

A medical ecosystem empowered by advanced medical education, cutting-edge technology and citizen-centric initiatives. Madhya Pradesh is architecting a robust and empathetic healthcare model leveraging regional expansion, emergency air ambulance networks, digital health frameworks, and deeply compassionate public welfare milestones.

THE CONVERGENCE OF HUMAN EMPATHY AND DYNAMIC GOVERNANCE

The true progress of any state is measured by the health and quality of life of its citizens. Under the visionary leadership of Chief Minister Dr. Mohan Yadav, Madhya Pradesh is pioneering a balanced and holistic healthcare blueprint spanning preventive, curative and geriatric care. Through the unprecedented expansion of medical education, emergency aero-medical services, advanced digital health ecosystems, significant improvements in maternal and child health indices, and dedicated care for the elderly, the state government has engineered a brilliant synthesis of policy-driven governance and profound human empathy. This comprehensive approach authentically translates the vision of 'Swasth Madhya Pradesh, Sashakt Madhya Pradesh' into a tangible, ground-level reality.

EXPANSION OF MEDICAL EDUCATION: STRUCTURAL FOUNDATIONS OF A SELF-RELIANT HEALTHCARE SYSTEM

The foundational strength of a healthcare system lies not merely in the volume of its infrastructure, but in the caliber and availability of its specialized human resources.

- **Record Surge in Institutions and Seats:** In 2003, the state possessed a modest count of just 6 medical colleges, a figure that has phenomenally scaled to 33 operational institutions today, with an ambitious roadmap to reach 52 colleges by 2028. Concurrently, MBBS seats have surged from 1,250 to 5,550. The addition of approximately 1,000 MBBS and 1,000 PG seats within the last two years alone is designed to decisively bridge the gap in specialized medical practitioners.
- **Expansion of Healthcare Services:** To extend tertiary healthcare expertise to remote regions, 'Letters of Award' have already been issued under the Public-Private Partnership (PPP) model for Dhar, Katni, Betul and Panna, while the initiative is rapidly advancing across 13 other districts.
- **A Vision for Every Constituency:** The state's resolute objective to establish at least one medical college in every parliamentary constituency is laying the cornerstone for a highly accessible, capable, and self-sufficient regional healthcare architecture.

EXEMPLARY STRIDES IN MATERNAL SAFETY AND CHILD WELLNESS

Safe motherhood and a malnutrition-free childhood
