

INDIA TOMORROW

Road to Aatmanirbhar Bharat

The 11th of December 2023 was a historic day for India when Prime Minister Narendra Modi made a call to the nation to rise for collectively shaping India's destiny and dream of a Vikist Bharat@2047. The landmark year coincides with the centenary year of India's independence from colonial rule. The slogan "Bold Vision Ahead" captures the essence of ambition, resilience, and commitment of India to pursue holistic development across every sector—economic, social, technological, environmental, and institutional with proactive citizen engagement.

The nation's journey toward becoming a developed nation by 2047 is powered by the bold national vision of Viksit Bharat@2047. Driving the ambition for self-reliance, progress and prosperity is an approach that is multi-pronged, holistic and inclusive in intent. "Empowering India's Bold Vision" is not just a government campaign; it's a call to action for every citizen to contribute meaningfully to this transformation. "For India, this is the time, right time (Yahi Samay hai, Sahi Samay hai)," observed Prime Minister Modi at the launch of the campaign.

During these years, India envisions achieving high per capita income and GDP growth, universal access to quality education, healthcare, and housing, advanced digital infrastructure and global innovation leadership, social justice, equity, and environmental sustainability. The campaign aims at creating a future-ready India that leads the world in innovation, equality, and sustainability. Prime Minister Modi said, "When citizens, in whatever role, start doing their duty, the country moves forward." The initiatives for realising a Vikist Bharat stands on eight core pillars of holistic development. They are economic transformation, digital empowerment, social inclusion, education and skill development, healthcare for all, infrastructure and urban growth, sustainable development and energy, governance and citizen participation. The road ahead is pitted with challenges, which requires a favourable policy landscape to ease the road ahead for transformation to happen.

The campaign for economic transformation focuses on manufacturing (Make in India 2.0), services, start-ups, and exports, increasing per capita income to be at par with high-income countries, formalising the economy and strengthening MSMEs, whereas, digital empowerment aims at expanding the Digital India mission: AI, 5G, cloud, quantum computing, besides allowing universal access to internet and digital literacy, E-governance and data-driven public service delivery. Urging the people of India to come forward and participate in this great vision, PM Modi stated, "Today, the aim of your goals, your resolutions should be only one – Developed India."

To fast track India's development modernizing transport and logistics, housing, energy infrastructure, creating smart cities, green buildings, sustainable urban planning and rural-urban connectivity and digital access are the thrust areas under infrastructure and urban growth initiatives. One the social welfare front emphasis is on inclusion by reducing gender disparities across caste, rural-urban, and income. Empowering marginalized communities through targeted welfare schemes and promoting social justice, dignity, and participation are part of the initiatives meant for building a sound society.

To create human resources that is educated, skilled and industry-ready, the central government has implemented NEP 2020 in letter and spirit.
