WATCH SPECIAL

GLOWING DIALS

RADIANT FACES

RARE STONES AND METALS AND INGENIOUS COMPLICATIONS RADIATE BEYOND THE DIAL.

BLOODSTONE REVIVAL

Zenith

G.F.J. in Yellow Gold with Bloodstone Dial

Bloodstone gives Zenith's scholarly G.F.J. a rakish streak. The dark green jasper, naturally flecked with red, makes every dial unique, while guilloché and mother-of-pearl add texture. A 39.15 mm yellow-gold case warms the composition. Inside, the revived hand-wound calibre 135 combines an oversized balance, Breguet overcoil, hacking seconds and COSC certification with a 72-hour reserve. Limited to 161 pieces, it makes chronometric history look wonderfully louche.

SAPPHIRE LACE

Chopard

Precious Lace Watch ref. 104278-1007

Chopard treats the watch as a piece of couture constructed from light. More than 1,000 brilliant-cut sapphires and diamonds form undulating, openworked ribbons around the dial, recreating the scalloped rhythm of guipure lace. The 18-carat ethical white-gold structure is set with 10.04 carats of sapphires and 1.39 carats of diamonds, while a faceted sapphire crystal adds another layer of refraction. Its discreet quartz movement wisely avoids competing with the jewellery. The time display is almost incidental, and in this instance, that is precisely the point.
