VAN CLEEF & ARPELS

Ludo Secret Watch ref. VCARPBM100

Secret Seduction

The Ludo Secret Watch turns an articulated 18K rose-gold ribbon into wrist-worn couture. Its supple briquette links recall the geometry of a glamorous belt, while 185 pink sapphires transform the buckle into a softly graduated blaze of colour. Press the flanking motifs and the cover opens to reveal a guilloché white mother-of-pearl dial, an intimate performance rather than a blunt display of time. The quartz movement is discreetly practical. The real complication is seduction, and Van Cleef & Arpels has engineered it beautifully.

LONGINES

Mini DolceVita ref. L5.200.4.87.6

Snow Sparkle

For 2026, Longines gives the Mini DolceVita its first snow-set dial and makes restraint sparkle. The 21.5 by 29 mm steel rectangle is filled with 163 diamonds arranged in irregular sizes, with white mother-of-pearl inserts softening the brilliance and blued hands adding an Art Deco accent. On its supple steel bracelet, it wears more like jewellery than a conventional watch, yet the quartz calibre L178 keeps it thoroughly practical. It proves that approachable luxury need not look apologetic, particularly when every glance at the time comes with its own flurry.
