Royal Oak Selfwinding Perpetual Calendar Openworked ref. 26685XT

Visible Eternity

The Royal Oak has never been shy, but opening its dial leaves the architecture nowhere to hide. Its 41 mm titanium case frames smoked calendar counters above openworked calibre 7139, revealing the bridges, gear train and pink-gold-toned rotor without sacrificing legibility. Mirror-polished Bulk Metallic Glass adds liquid gleam to the lightweight construction. The perpetual calendar tracks the day, date, month, leap year, moon phase and week number. Better still, every correction is made through the crown, with no tools, recessed pushers or anxiety around a very expensive machine.
