

Snapdragon Muscle with One UI 9 Manners
The Snapdragon 8 Elite Gen 5 for Galaxy handles up to 16GB of RAM and 1TB of UFS 4 storage without breaking a sweat and One UI 9 on Android 17 makes multitasking on the wider canvas feel deliberate rather than fiddly. Galaxy AI now handles live translation, note summaries and generative editing across split screens. The 4,800mAh battery lasts a full working day, and 45W wired charging reaches roughly 63 percent in half an hour. Seven years of OS and security updates sweeten the deal.

Fold it or Forget it
Buy this if you want a big screen without carrying a paper weight and if your photography rarely goes beyond a room's width. You might want to see its elder brother (8 Ultra) if zoom matters a lot.

The Fold 8 is the first Samsung foldable that stops arguing for the format and simply gets on with it. Losing the telephoto might seem like a sacrifice at this price and the IP48 rating is overdue for an upgrade. Even so, this is the most sensible foldable Samsung has made. And it is for the masses and classes.

Price ₹2,39,999 (1TB Variant)
