CHINTAN RESEARCH FOUNDATION:

Building a distinct voice in India's evolving think tank landscape

(From left to right): Mr Shishir Priyadarshi, President, CRF; Dr Shashi Tharoor, Member of Parliament; Mr Pranav Adani, Director, Adani Enterprises Limited; Mr Erik Solheim, former Minister of Climate and Environment of Norway; and Mr Aman Kumar Singh, President & Head, Strategy & Chairman's Office, Adani Group, unveil the CRF Annual Booklet.

"It is immensely encouraging to see how the Chintan Research Foundation, in just two years, has established itself as an important pillar of intellectual infrastructure that a rising India requires."

— Mr Pranav Adani, Director, AEL

As India navigates economic, technological and geopolitical change, ideas and evidence-based research are playing a critical role in shaping public policy.

India's policy landscape is evolving rapidly. As the world's fastest-growing major economy grapples with challenges ranging from energy security and climate change to technological disruption and shifting trade dynamics, the demand for informed policymaking has never been greater.

This has contributed to the rise of a new generation of institutions seeking to bridge the gap between research, government, industry and international organisations. While traditional policy bodies have long shaped public discourse, newer organisations are increasingly focused on connecting ideas with implementation and ensuring that research informs real-world decision-making.

Among them is the Chintan Research Foundation (CRF), which marked its second Foundation Day in New Delhi on June 19. In just two years, the organisation has emerged as a platform that brings together policymakers, diplomats, business leaders, academics and development practitioners to deliberate on some of the most pressing issues facing India and the wider developing world.

Its areas of focus reflect the changing nature of policymaking itself. Trade, sustainability, energy transition, industrial
