When a government works with clear intent and a well-defined policy, results do not take long to emerge. Earlier, the dropout rate in the state was 17-18 per cent. We have succeeded in bringing it down to 3 per cent."

Yogi Adityanath,
Chief Minister

Teachers empowered, learning strengthened

The success of any education system depends significantly on the quality and competence of its teachers. Guided by this principle, the Yogi Government has established teacher training as a key pillar of educational reform. For the academic session 2026–27, the first phase of the NISHTHA Training Programme has been launched through the DIKSHA Portal. Under this initiative, teachers teaching from pre-primary classes up to Class XII will receive online training. The programme has been divided into three major categories. The first category focuses on Early Childhood Care and Education, covering teachers from pre-primary to Class II. The second category is designed for teachers of Classes III to V and emphasises language proficiency and numeracy-based teaching methodologies. The third category targets secondary-level teachers and provides training on contemporary subjects such as cyber hygiene, e-waste management, action research, and environmental conservation. Being delivered through a digital platform, the programme is not only making teacher training more accessible and efficient but is also helping ensure effective monitoring and quality assurance.

Fostering a culture of innovation

There was a time when innovation, research, and technology-driven education were associated primarily with major cities and prestigious private institutions. Today, however, efforts are underway to cultivate scientific temper and an innovation-driven mindset even in government schools across Uttar Pradesh. Through the Bharat Innovates 2026 campaign, students in parishadiya vidyalaya and Kasturba Gandhi Balika Vidyalayas are being introduced to deep technology, research, scientific inquiry, and innovation. As part of the initiative, schools will organise special lectures, seminars, innovation quizzes, essay competitions, and technology-enabled learning sessions. The objective of these activities is to nurture curiosity, strengthen problem-solving abilities, and encourage creative thinking among students. Education experts believe that introducing children to science, technology, and innovation at an early stage better equips them to meet future challenges. The government's initiative is also being viewed as a significant step towards connecting students from rural and underprivileged backgrounds with modern knowledge systems and emerging opportunities.

Nutrition and education go hand in hand

Education extends far beyond classrooms and textbooks. A healthy and well-nourished child is better positioned to learn, grow, and succeed. Recognising this, the Pradhan Mantri Poshan Shakti Nirman Yojana is being regarded as an integral component of the state's broader education reform agenda. Under the scheme, more than 1.52 crore children studying in approximately 1.42 lakh schools across Uttar Pradesh are provided with hot and nutritious meals every day. The initiative has not only improved the health and nutritional status of children but has also played an important role in increasing school enrolment and attendance. The practice of community dining also promotes the values of social harmony and equality. Children from diverse social and economic backgrounds sit together and share meals, helping bridge social divides and fostering a more inclusive environment. More than 3.63 lakh cooks play a crucial role in the successful implementation of the scheme. The government has extended additional financial support to them through enhanced honorariums and has also linked them with health security schemes. Efforts are also being made to provide recognition and encouragement through culinary competitions organised in several districts, highlighting their contribution to the programme. The various initiatives being implemented across Uttar Pradesh indicate that the government no longer views education as a subject confined to schools alone. From fostering a reading culture and strengthening pre-primary education to enhancing teacher training, promoting technology-driven innovation, and ensuring nutritional support, a coordinated and comprehensive approach is being pursued at every level of the education ecosystem.

Taking Flight

Foundational Education in Uttar Pradesh

NIPUN Bharat Mission
Under the latest assessment conducted as part of the NIPUN Bharat Mission, 32,480 primary schools have been declared 'NIPUN'. In these schools, at least 80% of students in Classes I and II have achieved the expected proficiency levels in language and mathematics.

Operation Kayakalp
Under Operation Kayakalp, saturation of 19 essential infrastructural facilities has been achieved in primary and upper primary schools. A total of 1.32 lakh schools have been covered under the programme.

Education Budget
An allocation of ₹77,622 crore has been proposed for foundational education in the Budget for 2026–27.

Enrolment Drive
A total of 15.84 lakh children were enrolled in parishadiya vidyalaya during 2025–26.

Enhanced Honorarium for Teachers
The honorarium of Shiksha Mitras has been increased from ₹10,000 to ₹18,000, while that of part-time instructors has been raised from ₹9,000 to ₹17,000.

Right to Education (RTE)
During 2025–26, 1.85 lakh children secured free admission in private schools under the Right to Education Act.

School Chalo Abhiyan
Under the School Chalo Abhiyan for 2026–27, a target of enrolling 20 lakh children has been set.

Girls' Education
All 746 Kasturba Gandhi Balika Vidyalayas have been upgraded to provide free residential education up to Class XII for girls from disadvantaged sections of society.

Free Educational Support
Every year, more than 1.30 crore students receive ₹1,200 per student through Direct Benefit Transfer (DBT) for uniforms, shoes, socks, sweaters, school bags, and stationery. Free textbooks and workbooks are also provided to all students from Classes I to VIII.
