

features a walk-in wardrobe and a large attached bathroom. The bedroom extends onto a large cantilevered balcony running across the façade, finished with teak wood flooring, terracotta jaali screening, and VOX aluminium ceilings. The daughter's bedroom is conceived as a functional Japandi-inspired retreat, it features a centrally placed island bed to enhance movement. We positioned a custom oak wood study table seamlessly behind the bed. The bathrooms continue this philosophy of calm minimalism.

High-Functionality Kitchen Design

Tailored specifically to Bhubaneswar's humid climate, we designed the kitchen to balance industrial durability with the home's core aesthetics. To ensure longevity and minimal maintenance, the entire kitchen was customised in stainless steel using solutions from ArttDinox by Jindal Steel. The clean, metallic finish complements our minimal design language.

Ultimately, this Japandi Residence stands as a profound exploration of simplicity, restraint and meaningful living. By treating tight urban constraints as a canvas for our creativity, we successfully bridged the gap between raw architecture and an emotional sanctuary. Rather than chasing fleeting trends, we established a timeless architectural identity—one that feels calm, honest and deeply connected to its people.
