

**Framing the Indoors**

With the launch of Fenesta Partitions & Enclosures, the brand brings its deep expertise in fenestration into the heart of the home. Built around the philosophy of 'Spaces, Reimagined', the new category responds to contemporary homes where openness, natural light, privacy, and flexibility need to coexist. Fenesta's internal partitions allow homeowners to define spaces without closing them off entirely. This intelligent structural approach maintains visual continuity across rooms while simultaneously creating distinct, functional zones.

**Canvas for Personal Expression**

What sets the offering apart is the complete freedom to create a layout solution that is truly your own. Homeowners can fully customise their partitions across 50 plus special glass options, 20 plus architectural grid designs, multiple premium handle choices, four signature finishes and three distinct profile series, Linea, Perfecta and Imperia. The versatile range includes movement systems such as the Synchro Slider, Telescopic Slider, Soft Close Slider, Moving Wall, Invisible Slider and traditional Swing Doors, along with dedicated shower enclosures.

**Flawless Engineering**

From the level of privacy and light to the configuration, glass, grid, profile, finish, and hardware, every element can come together perfectly to complement the architecture and personality of a space. This design flexibility is backed by precision factory manufacturing, a seamless design-to-handover process, a 10-year warranty on profiles and a two-year warranty on hardware. With Partitions & Enclosures, Fenesta extends its core philosophy of 'Better by Design' from framing the outside world to shaping the personal spaces within—bringing together design, functionality, flexibility, and the reassurance of Fenesta's expertise.
