THESE SMALL CHANGES MAKE A BIG DIFFERENCE

- Swap one overhead light for a warm-toned floor or table lamp in the room where you unwind most.
- Add one air-purifying plant per 100 sq ft—snake plant or areca palm need minimal upkeep.
- Layer a rug and heavier curtains into your most-used room to soften hard echo.
- Reorient your seating to face a window, artwork or garden view instead of the entrance to create a greater sense of ease.
- Open windows for 15 minutes each morning to refresh indoor air.
