VASAL EDUCATION:

Pioneering a New Era of Excellence in Schools Across Punjab

Mr. Sanjeev K Vasal
Chairman
Vasal Education

In the heart of Punjab, a quiet revolution in education is taking shape. Vasal Education, spearheaded by visionary Chairman Sanjeev Kumar Vasal, has been redefining schooling with a mix of global standards, innovative learning and social responsibility. With a growing network of schools across Punjab, the group has set new benchmarks in quality education - ensuring that world-class learning remains accessible, inclusive and future-ready.

For Mr. Vasal, education is not just a business; it's a commitment to nation-building. "A school with a good reputation is like a banyan tree - you build it over decades with responsibility, not just with financial investment", he says. His schools, including Cambridge International School, Dasuya; GEMS Cambridge International School, Hoshiarpur; Ivy World School, Jalandhar; Ivy World Play Schools in Jalandhar and Ludhiana and the soon-to-launch Ivy World School, Phagwara, have consistently been ranked among India's best.

But what truly sets them apart is their unwavering focus on student empowerment. In an unprecedented move for school-level education, Vasal Education has awarded over ₹1 crore in scholarships this year alone to 52 meritorious students. "Such initiatives are common at the university level, but we are bringing this culture into school education. Awards are the best motivators", Mr. Vasal explains. Additionally, students from defence families receive free education, with a complete waiver on admission fees - an initiative that reflects Vasal Education's commitment to giving back to society.

A shining example of this support system is Arjun Rajput, a former scholarship student who, after six years of free education at Vasal Education's schools, has now risen to become the Captain of the Punjab Under-16 Team. His success story embodies the transformative power of opportunity and mentorship, a philosophy that underpins every initiative at these schools.

But academic excellence alone is not enough. Vasal Education believes that a child's well-being is as crucial as their report card. In an industry-first move, the group has endeavoured to bring mental health experts into the classroom. Students and parents attend regular counselling sessions, while workshops on art therapy, social etiquette and stress management, equip them with lifelong coping skills. In an innovative twist, the schools have integrated farming into mental wellness - giving students access to small farms where they grow wheat, rice, sugarcane and vegetables, connecting them to nature while instilling in them values of patience and resilience.

The commitment to holistic development extends to the faculty as well. Teachers are recruited on high merit, undergo regular training programmes and are even provided complimentary lunch - a small but powerful gesture reinforcing the value placed on educators. "Our teachers are the backbone of our schools. Investing in them is just as important as investing in infrastructure", says Mr. Vasal.

Innovation in education is another hallmark of Vasal Education. The schools are set to introduce 3D printing for students from Class 1, marking a bold step towards future-ready learning. This soon-to-be-launched initiative will give young learners hands-on experience with cutting-edge technology, fostering creativity and problem-solving skills from an early age.
