THE IMPACT

- India is the 7th most vulnerable country in terms of exposure to climate risk events
- The RBI estimates that extreme heat and humidity could cost India up to 4.5% of its GDP by 2030 due to lost labour hours
- The impact can be seen in lives lost—highest in the past decade—and damage to dwellings and crops

DISPLACEMENT

In 2024, India accounted for 12% of all disaster-related internal displacements globally
