

THE REFORMS PUSH
Chief Minister A. Revanth Reddy at a public gathering in Hanamkonda, Nov. 19, 2024

A HOLISTIC OVERHAUL

The Bhu Bharati system will not only fill the gaps in Dharani, but also integrate technology and governance to streamline processes

↘ SIMPLIFIED PROCESSES
The Bhumata portal reduces the number of modules from 33 in the Dharani portal to just 6, ensuring ease of navigation for users, especially farmers

↘ DETAILED LAND RECORDS
The manual *pahani* (land register) system, reduced to a single column in Dharani, is replaced with an 11-column format, to allow comprehensive land record details

↘ CLEAR DEMARCATION
Mandatory inclusion of survey maps during property registrations should come in useful for resolving boundary disputes and double registrations

↘ UNIQUE IDENTIFICATION
Like Aadhaar for individuals, Bhudhaar will provide a unique identification number for each land parcel. This should ensure clear ownership details and facilitate seamless transactions

↘ DUAL RECORD-KEEPING
Manual land records will be maintained alongside digital databases to bolster accuracy and prevent data loss

↘ REDRESS MECHANISM
The system decentralises grievance resolution, empowering local officers to address disputes swiftly; also introduces a two-tier appellate system and land tribunals for escalated cases

A New Identity

Akin to Aadhaar for individuals, the new reform proposes a Bhudhaar. It will be an 11-digit unique identification number for each land parcel, linked to a detailed ownership record. Initially issued as temporary numbers, pending the geo-referencing process, permanent Bhudhaar will be granted upon completion of field surveys, ensuring accuracy and preventing disputes over boundaries. It is also expected to play a crucial role in maintaining transparency and reducing fraud, while providing landowners with easy access to their complete records, as revenue minister Ponguleti Srinivas Reddy puts it, "at the click of a mouse".

Another significant change is the drastic simplification of user interaction, with the number of modules reduced from 33 in Dharani to just six in Bhumata, making the portal far more navigable for users, especially farmers. They can now also track their applica-
