GURUSPEAK

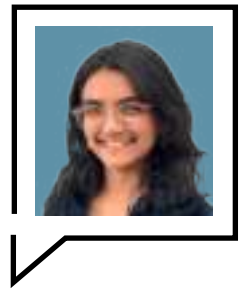

"SPAV has signed many MoUs and collaborative agreements. Some notable collaborations are with Ecole Bleue Design (Paris), University of Lille, Hafencity Universität (Hamburg), NTNU (Norway), University of Florence, and UN-Habitat. They facilitate academic exchange, joint research, and global exposure"

DR S. RAMESH
Director, School of Planning and Architecture, Vijayawada

Urban Planning and Capacity Building (A-CUPCB), established under the Union ministry of housing and urban affairs (MoHUA). It has positioned SPAV at the forefront of urban research, with an emphasis on climate-resilient planning, coastal vulnerability and capacity development. Through A-CUPCB, SPAV conducts training programmes and supports municipal governance via planning tools and data infrastructure. It has hosted over nine capacity-building programmes on themes like coastal resilience, urban heat mitigation, natural resource management and environmental simulation. These programmes blend fieldwork, technical software training, stakeholder engagement and policy insights, empowering over 110 urban professionals across ministries, academia and municipalities.

STUDENTSPEAK

"The academic environment, shaped by a passionate faculty and driven students, encourages collaboration. It prioritises critical thinking and personal growth. SPAV is a place where every student, regardless of background or limitation, can find their space and story"

HETVI KAILA
BArch, 4th year

In addition to training, A-CUPCB leads research projects across India. These address urban challenges such as low-emission zones, energy efficiency in bylaws, urban heat mitigation, flood resilience and transportation flows—providing data-backed solutions rooted in field realities. Projects are being carried out in Ahmedabad, Bhopal, Kakinada, Hyderabad, Machilipatnam, Tirupati and Vijayawada.

SPAV has collaborated with institutions like IIT Roorkee, SPA New Delhi, NID Andhra Pradesh, National Remote Sensing Centre ISRO, Andhra Pradesh government departments and ASSOCHAM. These collaborations span areas like capacity-building, regional planning, green infrastructure, GIS (geographic information system)-based research and policy development. SPAV also does its bit for social advancement. Under the Unnat Bharat Abhiyan (UBA), it has adopted five villages in Krishna district—Savarigudem, Jakkulanekkalam, Kesarapalle, Ajjampudi and Buddavaram, supporting development planning and awareness drives. ■
