STUDENTSPEAK

“The faculty is extra supportive and attentive. Our professors go out of the way to help students in their studies, clearing doubts, and pushing their limits

SHIKHAR SUDHIR SINGH
BBA, 2nd semester

tive learning pedagogy’ for all courses.

In the post-pandemic period, one of the biggest pedagogical challenges was to stem declining physical attendance amidst health scares, and redesigning curricula accordingly. The School made significant investments in ERP (Enterprise Resource Planning) and learning management systems to integrate offline engagement with online content. Video lectures and live sessions were arranged for students to learn continuously. “The pandemic also offered the opportunity to examine old and outdated content and make the curriculum modern and relevant to emerging business trends and realities. As a response, we introduced a lot of digital learning and embedded technology in classrooms,” says Prof. Mohanty.

The school also started involving industry more than ever before to deliver cutting-edge content to students. Partnerships with IBM and Zell Education are examples. The curriculum was also globalised by onboarding international faculty and assessment systems were overhauled by assigning more weight to continuous evaluation.

In the past two years, the School of Business has added new programmes in collaboration with IBM in Analytics and tied up with the reputed Kedge Business School of France to jointly deliver four cutting-edge programmes in entrepreneurship and sustainability. It also established an innovation lab with inputs from top academics and researchers to assist faculty in conducting high-quality research in management and allied disciplines.

Going forward, many BBA students choose the MBA with dual specialisation as it opens up a range of jobs, including an industry-driven switch from one function to another. For instance, a dual specialisation in marketing and business analytics equips you for a job in both marketing and marketing analytics.

The School of Business is future-ready, and its burgeoning roster of students is a testament to its excellence. ■
