

Programmed for Excellence

A quiet achiever, MSI has steadily built a reputation for rigorous academics, standout placements and a hands-on approach to tech education

By **AVISHEK G. DASTIDAR**

IN the competitive higher education landscape of Delhi NCR, where legacy institutions dominate the conversation, Maharaja Surajmal Institute (MSI) has emerged as a quiet but formidable force. Tucked away in the institutional area of Janakpuri in West Delhi, MSI has steadily evolved from a well-regarded regional college into a nationally respected name.

Established in 1999 under the Surajmal Memorial Education Society and affiliated with Guru Gobind Singh Indraprastha University, MSI's rise wasn't an overnight one. It is the product of long-term planning, academic rigour and a faculty-driven focus on quality. One such example is its flagship Bachelor of Computer Applications (BCA) programme, consistently ranked among the best in the country. While strong placement records matter, Dr Neetu Anand, spokesperson of the institute and a BCA faculty member, stresses the real differentiator lies in how students are taught, trained and mentored for "real-world opportunities".

That preparation begins with world-class infrastructure: over 400 computers in multiple air-conditioned ICT (Information and Communication Technology) labs and high-speed Wi-Fi. A full-scale research and financial lab further deepens the technical foundation for students. MSI's emphasis on experiential learning has been recognised by industry as well. It recently received a Certificate of Excellence as a Training Centre for Business Intelligence and Data Analysis and has been named a Champion Promoter for IBM's SkillsBuild Programme. The aim is clear—to bridge classroom learning with real-world application.

STUDENTSPEAK

"Most of our faculty hold PhDs and are experts in their fields, which gives us a significant academic edge. Our placement record is equally strong. It stood at 100 per cent last year"

PRANAV JHA
BCA, Final year

HOLISTIC PUSH

Beyond infrastructure, what truly sets MSI apart is its student engagement model. With over 40 active societies, a well-structured mentor-mentee programme, regular hackathons, pre-placement talks and industry-led training sessions, students are immersed in an environment that fosters both academic and professional growth. The library alone offers access to 29,000 e-books and 4,300 e-journals.

Marking its silver jubilee, MSI expanded its academic scope through international conferences, research collaborations and partnerships with Grant Thornton, Internshala and Pearson India. The results are beginning to show. In 2024, a student from MSI landed a job at the global investment and technology development firm DE Shaw with an annual package of Rs 22.5 lakh—among the highest in the country for a fresh graduate. For a college once seen as a regional option, MSI is now shaping up to be a national player with a clear eye on the future. ■
