DAYANAND MEDICAL COLLEGE & HOSPITAL, LUDHIANA (PUNJAB)

Nestled in the heart of Ludhiana, Punjab, Dayanand Medical College & Hospital (DMC&H) stands as a towering symbol of medical excellence, compassion, and innovation. With its 1,625 bed capacity including high class 224 ICU beds, this multi super specialty, tertiary care teaching hospital, along with its specialized units, Hero DMC Heart Institute and Cancer Care Centre has earned its reputation as the most trusted healthcare institution in Punjab, neighboring states, and among non resident Indians (NRIs).

Guided by a mission to prioritize patient care with competence and compassion, DMC&H is not only a preferred destination for advanced medical treatments but also a premier choice for medical education. Equipped with cutting edge technology and a commitment to research, the hospital delivers world-class healthcare while continuously pushing the boundaries of medical science.

A HUB OF ADVANCED MEDICAL TECHNOLOGY

DMC&H is synonymous with innovation, boasting state of the art medical equipment designed to ensure precision in diagnosis and efficacy in treatment. From advanced diagnostic tools to sophisticated surgical systems, every facet of the hospital's infrastructure is tailored to provide the highest standard of care. This commitment to technological excellence permeates every department, enabling DMC&H to address a wide spectrum of medical conditions.

PIONEERING CARDIAC CARE AT HERO DMC HEART INSTITUTE

The Hero DMC Heart Institute (HDHI), the cardiac care arm of DMC&H, is a regional leader in cardiovascular medicine, renowned for its expertise and cutting edge interventions. HDHI offers world-class treatments. Its team of highly specialized cardiac surgeons is trusted across Punjab and beyond, with an impressive track record of performing over 98% of bypass surgeries using Total Arterial Bypass Grafting with Bilateral Internal Mammary Artery-a statistic that places HDHI among the global elite.

The institute also leads in physiological pacing, a cost-effective technique for heart failure patients, often dubbed the "poor man's CRT." Additionally, HDHI's expertise in paediatric and neonatal cardiac interventions ensures comprehensive care for congenital and acquired heart conditions from infancy through adolescence.

REVOLUTIONIZING CANCER CARE

The Department of Clinical Hematology and Bone Marrow Transplant (BMT) at DMC&H is a cornerstone of its oncology services. Having performed nearly 100 stem cell transplants-autologous, allogeneic, and matched unrelated donor (MUD)-the department is a well established center for both adult and paediatric patients. A landmark achievement came with the successful execution of the region's first Chimeric Antigen Receptor T-cell (CAR-T) therapy, a groundbreaking immunotherapy that genetically modifies a patient's immune cells to target and eliminate cancer cells.

LEADING THE WAY IN LIVER TRANSPLANTATION

Liver transplantation is among the most complex procedures in modern medicine, requiring exceptional skill and coordination. DMC&H's liver transplant program has rapidly gained prominence, with 14 successful transplants performed in just six months. Of these, four utilized cadaveric donors, while ten involved living donors, typically family members. The hospital's state of the art operation theatres and dedicated liver transplant ICUs ensure optimal outcomes. Looking ahead, DMC&H aims to expand its services to include paediatric liver transplants and multi-organ procedures.
