SRI VENKATESHWARAA GROUP OF INSTITUTIONS (SVGI), PUDUCHERRY

From humble beginnings to becoming a beacon of excellence in education and healthcare, the Sri Venkateshwaraa Group of Institutions (SVGI), Puducherry, exemplifies the vision and determination of its Founder-Chairman, Shri B. Ramachandran. His tireless efforts have redefined the educational landscape of Puducherry and paved the way for the establishment of Sri Venkateshwaraa University in Tamil Nadu, with campuses in Chennai and Ettayapuram—ushering in a new era of holistic, inclusive learning, especially in rural regions.

Shri Ramachandran's mission has always been clear: to provide affordable, quality education and accessible healthcare to underserved populations, aiming to bridge the urban-rural divide in opportunities and well-being. Aligned with this vision, SVGI has evolved into a multidisciplinary academic ecosystem, offering programs in engineering, medicine, dentistry, pharmacy, nursing, physiotherapy, paramedical sciences, agriculture, and management (MBA).

At the heart of SVGI is the Sri Venkateshwaraa Medical College Hospital & Research Centre (SVMCH&RC)—a NAAC A+ accredited institution attached to a 1200-bedded NABH & NABL accredited super-specialty hospital. With advanced infrastructure, including kidney transplantation units, critical care ICUs, and state-of-the-art diagnostic services, SVMCH&RC serves as a regional hub for clinical excellence and medical education.

Shri B. Ramachandran, Founder-Chairman

The SVGI also hosts a recognized Research Centre, promoting clinical, public health, and translational research, backed by ICMR and DST-funded projects. It fosters a strong research culture through a robust ethics committee, structured training programs, and interdisciplinary collaborations, focusing on community-centred, evidence-based healthcare solutions.

Recognized as a Scientific and Industrial Research Organization (SIRO) by DSIR, SVGI continues to advance academic excellence, technological innovation, and rural empowerment, building a future grounded in knowledge, care, and social responsibility.

EMPOWERING FUTURE BUSINESS LEADERS AT S.A. COLLEGE OF ARTS & SCIENCE

S.A. College of Arts & Science, located in Thiruverkadu, Chennai, offers an AICTE-approved MBA programme through its School of Management. This programme is designed to help students grow into confident, capable, and responsible business leaders.

The MBA course focuses on experiential learning and encourages innovation, incubation, and entrepreneurship. The program offers dual electives, where students can specialize in various management domains like Marketing, Finance, Human Resource, Logistics and Supply Chain, Business Analytics, and many more. The college also provides access to business labs and centres of excellence, giving students hands-on experience into the real business situations.

The programme provides a great teaching learning experience for the management grads with its dedicated team of experienced faculty within industry, teaching, and research. The professors of practice from industry provide domain functional knowledge to the students which is imperative to become industry ready. The institution has signed MoUs with industries and offers professional body memberships to help students build networks and stay industry connected. Students also take part in social immersion programmes, outbound training, and tech-oriented certifications, which add great value to their learning.

Along with the MBA, the college also offers a wide range of academic programmes. There are 13 undergraduate programmes across B.Com., BBA, B.A., and B.Sc. streams, covering areas such as commerce, management, humanities, computer science, and life sciences. The BBA and BCA programmes are AICTE approved. At the postgraduate level, the college offers MBA, M.Com., and M.Sc. programmes, providing students with diverse opportunities for academic and professional growth.

Guided by the inspiring motto, "You Predict, Together We Create," S.A.College of Arts & Science remains committed to shaping the future by nurturing young minds. With a modern learning environment, strong industry links, and a student-focused approach, the college is an ideal place for those who aspire to make a real impact in the world
