

No. 1 ALL INDIA INSTITUTE OF MEDICAL SCIENCES *New Delhi*

GURUSPEAK

"AIIMS is not just a leader in medical education in India. We are now also amongst the top 100 in the world. This is due to a combination of excellence in research, infrastructure, teaching and patient care"

DR M. SRINIVAS
Director, AIIMS Delhi

5 REASONS WHY IT IS THE BEST

1 Faculty at the All India Institute of Medical Sciences Delhi include some of the top doctors in the country in their respective fields. Learning and working beside them gives students an opportunity to share in their vast experience. It is a huge advantage over other medical schools.

2 At AIIMS Delhi, research is not just routine but an integral part of the curriculum. One of the goals of the institution is to inculcate and encourage a scientific temper in all students. The average student teacher ratio of 6:1—far better than the national average of 29:1—also allows for the development of deep mentorships.

3 Be it the SET (skills, e-learning, telemedicine) lab, the extensive library and reading material available, or the simulation-based learning opportunities, AIIMS provides excellent specialised infrastructure for students. It is also the first medical institution in the country to receive latest technology or new drugs to test.

4 The practical exposure for an AIIMS student is also enviable. Being a student at the country's premier public hospital—which is visited by vast numbers of people from across India and often asked to treat the toughest of cases—inevitably leads to a wealth of experiences in patient care. Every year sees research on new therapies/ treatments.

5 Graduates from AIIMS Delhi are leaders in the field of medicine. Considered for long the best medical institute in the country, the value and respect for a student from this institution remains untarnished till date.
