STUDENTSPEAK

"AIIMS Jodhpur offers a perfect blend of academic excellence and vibrant campus life. With state-of-the-art sports facilities, active student clubs and a focus on holistic development, it provides an exceptional undergraduate experience"

SANCHITA GHIYA
Final-year MBBS, AIIMS Jodhpur

rector, AIIMS Jodhpur. Infrastructure, too, has improved, with OTs at the hospital increasing from 16 to 32 in five years, beds from 728 to 960, ICUs from 19 to 134, junior residents from 328 to 476, senior residents from 145 to 398 in the same time period. Unsurprisingly, the college is the most improved in India Today-MDRA medical rankings.

PURUSHOTTAM DIWAKAR

"We have a close mentorship programme where a faculty member and a student are paired and there is always someone to guide and support them through the years," says Dr Dixit. A self-directed and problem-based learning approach unique to AIIMS Jodhpur is applied in two ways—horizontal learning (characterised by a broad collection of knowledge, and focusing on connecting disciplines), and vertical learning (which deals with subjects with depth and applies scientific concepts to clinical practice from early on). With 1.3 to 1.4 million OPD patients every year, students say there is a wealth of opportunity to learn about patients and diseases.

The institute connects to communities in Rajasthan through two unique endeavours. First is the two-year school of public health. Started in 2017, it aims to impart training through problem-solving exercises, observerships in public health organisations and case studies. Second, the institute is recognised as a "Centre of Excellence for Tribal Health" by the Union ministry of tribal affairs and a unique centre was conceptualised to address the health needs of tribals.

It is precisely this unique blend of classroom teaching, diverse clinical exposure, inter-disciplinary learnings as well as mentorship by faculty that makes AIIMS Jodhpur a desirable choice now for many an aspiring medical student. ■
