Chancellor, Reva University

REVA UNIVERSITY: POWERING FUTURE-READY LEADERS THROUGH INNOVATION AND EXCELLENCE

Walk into the 45-acre lush green campus of REVA University in Bengaluru, and you'll feel the unmistakable pulse of innovation, ambition, and academic excellence. Established in 2012, and guided by the visionary leadership of its Chancellor, Dr. P. Shyama Raju, REVA has swiftly emerged as one of India's premier destinations for holistic, future-oriented education.

At the core of REVA's mission lies a simple but powerful belief: Great education creates great opportunities. With a blend of international academic standards and deep-rooted Indian values, REVA reimagines education through experiential learning, interdisciplinary research, and strong industry integration. Dr. Shyama Raju talks about his vision: "Our goal is to create a student-centric ecosystem that prepares young minds not just for careers, but for a lifetime of impact."

More than just a university, REVA is a vibrant community. With outdoor classrooms, cultural arenas, modern hostels, global food courts, and sports infrastructure, the campus develops peer learning, creativity, and holistic growth.

Hands-On Learning. Global Outlook. AI- Empowered.

What makes REVA University stand out is its commitment to hands-on, practical learning. From 200+ smart classrooms and tech-enabled lecture capture systems to real-industry-like laboratories and business simulation labs, every corner of the campus is designed to bring theory into action.

"Our goal is to create a student-centric ecosystem that prepares young minds not just for careers, but for a lifetime of impact."

REVA's Centres of Excellence, driven by student innovation and industry guidance, have made the campus a hub for cutting-edge research and enterprise. Whether it's AI, IoT, cybersecurity, robotics, or aerospace, students are mentored to take on real-world challenges from day one. REVA also stand at the forefront of this educational transformation by becoming a university with an AI-first approach. We constantly strive to place AI at the heart of academics and learning. Embracing innovation and future readiness, we proudly position ourselves as an AI-First University, leading tomorrow's education today. Our approach is not about merely keeping pace with technological advancements; it is about pioneering their application to create a lasting impact. We have seamlessly integrated AI into our curriculum, ensuring that learning is not just efficient but also engaging and forward-thinking.

Engineering the Future

Engineering at REVA is offered through its multiple schools—**Civil, Computing & Information Technology, Computer Science and Engineering, Mechanical, Electronics & Communication, and Electrical & Electronics**—at undergraduate, postgraduate, and research levels. These schools provide integrated, specialised learning environments that blend academic knowledge with hands-on technical training. Additionally, diplomas, minor degrees, honours degrees and certificate programmes open up pathways for upskilling and continuous learning.

In addition to its established B.Tech. programmes in Electronics and Communication, Electrical and Electronics, Mechanical and Civil Engineering, REVA now offers cutting-
