

ENERGISING THE FUTURE

Come February, all eyes will be on the upcoming India Energy Week'2025 in Delhi, which will spotlight the innovations, collaborations, and strategies driving the global energy dialogue. With engaging conferences, roundtables, thematic zones, startup challenges, and critical themes, IEW'2025 promises to be a melting pot of ideas shaping the future of energy.

Security and self-sufficiency in energy, combined with a steadfast pursuit of decarbonisation, lie at the heart of India's aspirational vision of becoming a Viksit Bharat (Developed India) by 2047. The country's energy sector is increasingly recognised for its boundless potential and relentless drive for innovation. This strategic vision is backed by landmark reforms across the upstream, midstream, and downstream segments of India's hydrocarbon industry.

The Union Government has introduced transformative measures, including diversifying crude oil supplies to reduce dependence on select regions, reforming gas pricing to ensure transparency and affordability, introduction of the Oilfields (Regulation and Development) Amendment Bill 2024 and opening previously restricted NO-GO areas for exploration and production. These efforts collectively aim to create a sustainable, affordable, and secure energy future for India.

A key highlight of India's progress is the rapid advancement in ethanol blending. The percentage of ethanol blended in petrol has surged from a mere 1.53 per cent in 2014 to an impressive 19 per cent in December 2024, with a target to achieve 20 per cent by 2025. This remarkable milestone positions India as the second-largest economy globally in biofuel blending, trailing only Brazil,

Against this backdrop, India Energy Week 2025 (IEW'25) assumes extraordinary importance as a platform to showcase India's energy achievements and shape the global energy agenda. Scheduled to be held from 11th to 14th February 2025 at the state-of-the-art Yashobhoomi Convention Centre in New Delhi, this flagship event is set to become the most comprehensive, inclusive and first global energy gathering of the calendar year.

UNPARALLELED SCALE AND GLOBAL PARTICIPATION

The 2025 edition of IEW is poised to outshine its predecessors in scale and scope. Some key highlights include:

- Representation from over 20 Foreign Energy Ministers and Deputy Ministers, spanning advanced economies, leading energy producers, and nations from the Global South.
- Attendance by 90 CEOs and senior leadership from Fortune 500 energy giants such as bp, TotalEnergies, QatarEnergy, ADNOC, Baker Hughes, ExxonMobil, and Vitol, underscoring the event's global appeal.
- Participation by 70,000 delegates from 120 countries, showcasing the event's truly international stature.
- Exhibition by 700+ companies and 10 country pavilions, including the United States, the United Kingdom, Germany, Italy, Japan, and Russia, offering diverse insights and opportunities.
- Nine thematic zones including India Net Zero, Make in India, Hydrogen, Biofuels, Renewable Energy, Petrochemicals, LNG ecosystem, Startup Zone and Digitalisation & AI and CGD zone dedicated to cutting-edge energy solutions.

> "In just two years, IEW has cemented its place on the global energy calendar, owing to India's rapid economic growth, expanding consumer base, and favourable investment climate. It has rapidly become a significant global energy platform, attracting millions of dollars in business and establishing itself as the new meeting point for energy professionals worldwide. IEW 2025 will further spur the movement towards creating a greener, smarter, and more resilient energy ecosystem."

Compared to the 2024 edition, which hosted 600 exhibitors and 91 conferences, IEW 2025 marks a significant expansion with a 29 per cent increase in abstract submissions and a 24 per cent rise in speaker participation, reinforcing its role as a dynamic platform for industry innovation and collaboration.

IEW 2025 is organised by the Federation of Indian Petroleum Industry (FIPI) under the aegis of the Ministry of Petroleum and Natural Gas. The event benefits from active participation by other key ministries, including the Ministry of Power, Ministry of New and Renewable Energy (MNRE), NITI Aayog, and the Ministry of Mines and Minerals. This whole-of-government approach ensures seamless collaboration and holistic engagement across India's energy ecosystem, reaffirming the nation's commitment to integrated energy solutions.
