

"The next phase of digital health will be driven by continuous biometric data combined with Artificial Intelligence and machine learning, enabling people and healthcare systems to act before illness takes hold"

TOM HALE
CEO, Oura

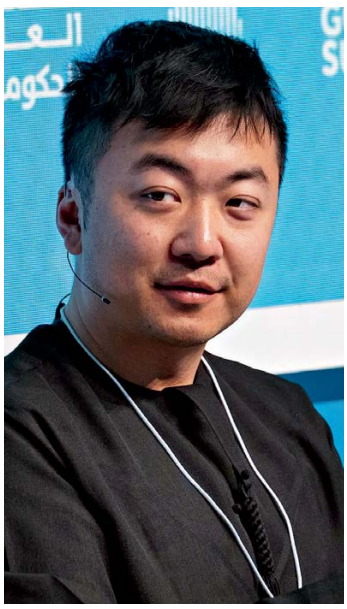

"Will people consume less video in the future? I don't think so. Having said that, people are investing in AI anticipating future demand. I would hate to be the CFO of one of these companies and have to explain ROIs to investors"

JOSEPH TSAI
Chairman, Alibaba

THE WORLD'S AI RECKONING

AS THE NEW TECH RESHAPES INDUSTRIES, THE WORLD GOVERNMENTS SUMMIT IN DUBAI CONFRONTS NOT WHAT MACHINES CAN DO, BUT WHAT HUMANS SHOULD

"I first tried vibe coding a year ago and the models weren't smart enough. Every interaction introduced more bugs than actually solving problems. But in December the models got really strong. In January, when I restarted, I was very impressed by the capability difference"

CARL PEI, *CEO, Nothing*

"It's about helping people first and not getting caught up in how much the technology can do"

NOLAND ARBAUGH
First recipient of Neuralink's brain-computer interface
