“India has a big potential in terms of sales and production. We want to double the stores in India”

DANIEL GRIEDER
CEO, Hugo Boss

“We have learned that progress does not come from copying others’ models but from creating our own, rooted in foresight and powered by partnerships”

MOHAMED ALSHARHAN
MD, World Governments Summit

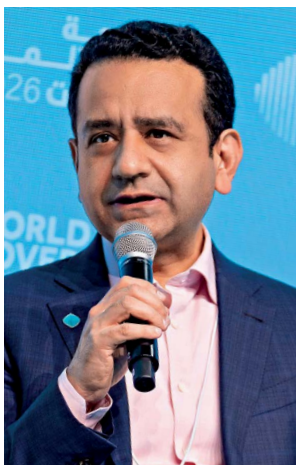

“Every nation is waking up to the fact that technology can help amplify the impact of defence, finance and many other industries. Tech is becoming as, or even more, important than finance in driving future growth”

ARVIND KRISHNA
CEO, IBM

“The India-US deal is a win-win. Nobody can dictate terms to India”

M.A. YUSUFF ALI
Chairman, Lulu Group

“If your ambition with AI is to get rid of a few jobs or improve productivity, you are missing the picture. The objective, for instance, should be: how can we provide everybody a truly world-class healthcare service for $10 a month?”

MOHIT JOSHI
CEO & MD, Tech Mahindra

“The future is open-source because it provides total transparency into what’s happening underneath the hood”

CHAMATH PALIHAPITIYA
Venture capitalist and entrepreneur
