

HOW DIAGEO INDIA IS FUELLING THE VIKSIT BHARAT AGENDA THROUGH ITS ECONOMIC AND SOCIAL FOOTPRINT

Behind India's ambition to become a developed nation lies the work of sectors that build capability at scale. In this conversation, Praveen Someshwar, MD & CEO of Diageo India (USL), shares how the company contributes to that ambition through its economic and social footprint: from ₹49,038 crore in total GDP contribution and nearly 6.5 lakh livelihoods supported, to a fiscal contribution of ₹20,417 crore to the exchequer in FY24.

Praveen Someshwar
Managing Director and CEO

Q1. India's Viksit Bharat vision is ultimately about building a resilient country. How do you interpret that ambition from the vantage point of Diageo India?

At Diageo India our focus is to drive a shift from episodic growth to sustained capability building that drives economic value, whether through manufacturing, a skilled workforce, or a responsible ecosystem that is focused on doing business the right way. We operate in a sector that sits at the intersection of agriculture, MSMEs, logistics, and services. That means our economic impact flows through India's industrial and social fabric.

An independent study by the Pahle India Foundation on Diageo India's contributions to Viksit Bharat illustrates this powerfully. Through our 36 manufacturing units, we anchor regional economies while supporting 5,832 direct jobs. But the real story lies in the larger ecosystem: 6,43,870 indirect jobs sustained across India, taking our total employment footprint to nearly 6.5 lakh people.

DID YOU KNOW?
