

About Global Academy of Technology

Global Academy of Technology: Nurturing Innovation, Empowering Leaders

Established in 2001, Global Academy of Technology (GAT), Bengaluru, stands as a beacon of academic excellence in Engineering and Management. Renowned for its rigorous academic environment and industry-aligned pedagogy, GAT is committed to fostering a holistic educational ecosystem that bridges the gap between classroom theory and global practice.

A Sustainable, Future-Forward Green Campus

Nestled within a serene, green and eco-friendly landscape, GAT is a pioneer in institutional sustainability. Completely powered by solar energy, our campus provides a tranquil yet technologically advanced environment that inspires creativity and mindful learning.

A Culture of Research & Industry Integration

GAT is home to a thriving research culture where faculty and students collaborate on breakthrough innovations. With a prolific record of international publications and patents, the institution remains at the forefront of technological advancement.

Academic & Pedagogical Innovation

As an autonomous institution, GAT leverages its academic freedom to craft a dynamic curriculum that anticipates the needs of the Fourth Industrial Revolution. Our educational framework is built upon:

- **Experiential Learning:** Prioritizing hands-on exposure through state-of-the-art laboratories and real-world projects.
- **Outcome-Based Education (OBE):** Ensuring every student achieves specific, measurable competencies.
- **Modern Pedagogy:** Implementing continuous assessment and flexible learning paths that empower students to specialize in emerging domains.

Our strategic Industry Institute Collaborations encompassing premier organizations provide students with unparalleled access to professional mentoring, high-impact internships, and industrial consultancy.

Legacy & Global Impact

With a powerful network of over 60,000 alumni spanning the globe, GAT's influence extends into every sector of the modern economy. Beyond technical proficiency, we emphasize ethical leadership and social responsibility, ensuring our graduates emerge as confident professionals ready to address the complex challenges of a globalized world.

Centre of Excellence

Global Academy of Technology has established multiple Centre of Excellence (CoEs) to strengthen advanced learning, applied research, and industry readiness. These centre function as knowledge hubs where students and faculty collaborate on cutting-edge technologies, real-world challenges, and interdisciplinary innovation.

A flagship facility is the Centre for Computer-Integrated Manufacturing (CCIM) equipped with CNC machining centres, advanced hydraulics and pneumatics systems, robotics, and 3D printing facilities, CCIM bridges the gap between classroom theory and industrial practice. The centre actively supports undergraduate projects, value-added programs, corporate training, and sponsored research in manufacturing, automation, and additive technologies, with industry engagement including collaborations with organizations such as Toyota.

The Aerospace Centre of Excellence in High-Speed Flow, developed in collaboration with CSIR–National Aerospace Laboratories (NAL), features advanced facilities including supersonic and subsonic wind tunnels, high-speed jet testing systems, and impact testing setups simulating extreme flow conditions. This centre enables advanced research in aerodynamics, propulsion systems, and aerospace structures.

In the digital domain, the NTT DATA Centre of Excellence in Full Stack Computing focuses on emerging areas such as Full Stack development, cloud computing, data-driven applications, and enterprise technologies. The centre supports industry-aligned curriculum delivery, hands-on training, faculty upskilling, internships, and placement-oriented skill development, preparing students for global IT careers.

Together, these Centres of Excellence reinforce GAT's commitment to innovation, industry relevance, and experiential learning.

IBM Z Datathon

GAT has hosted the IBM Z Datathon for the last three years. We are one of only two venue partners in India, with students participating from across the country. This shows our national visibility and commitment to preparing students through industry-linked events.

Innovation, Incubation & Entrepreneurship Ecosystem (IIE Cell)

The Innovation, Incubation, and Entrepreneurship Cell (IIE Cell) at GAT is a dynamic platform dedicated to nurturing creativity, innovation, and entrepreneurial thinking among students, faculty, alumni, and external innovators. Established with a vision to build a self-sustaining innovation ecosystem, the IIE Cell provides structured support across ideation, pre-incubation, prototyping, Start-up incorporation, and acceleration stages.

The incubation centre operates from a 5,000+ sq. ft. state-of-the-art facility, featuring an Idea Innovation Lab, maker spaces, 50 workstations, discussion rooms, video conferencing halls, high-speed internet, and 24×7 power backup. This infrastructure enables collaborative learning, Start-up development, and industry mentoring.

GAT's IIE Cell actively functions under the Institution's Innovation Council (IIC), an initiative of the Ministry of Education's Innovation Cell (MIC) and AICTE. Through entrepreneurship awareness programs, bootcamps, innovation challenges, FDPs, and mentorship initiatives, the cell fosters a culture of problem-solving and enterprise creation.
